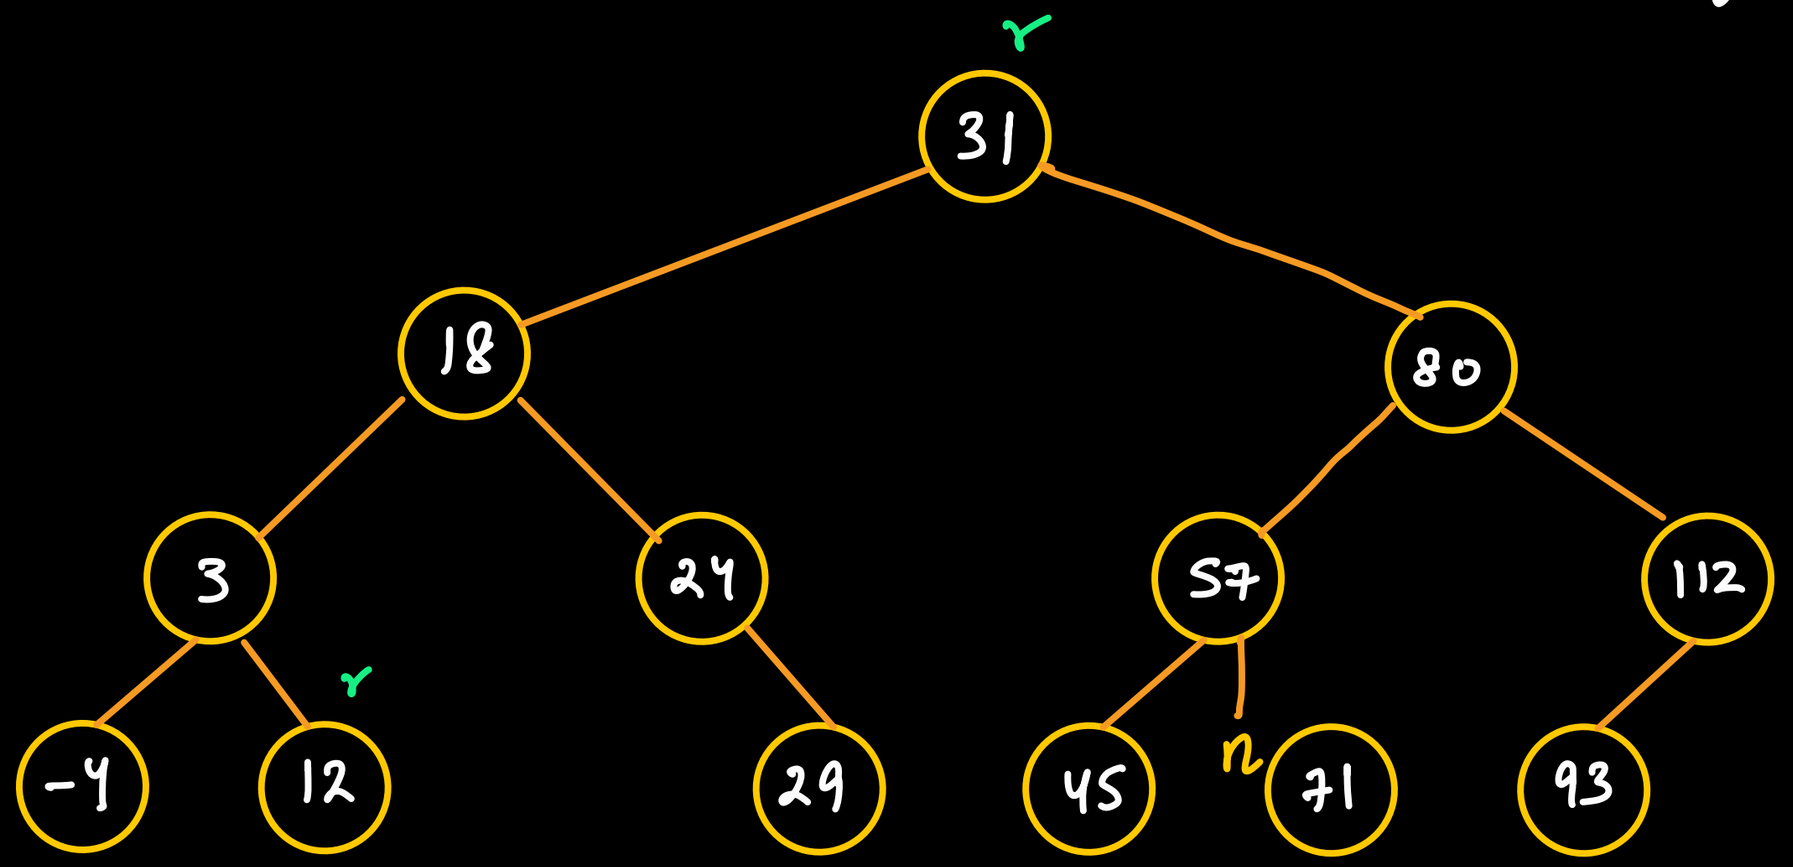
H.W: Construct BST from Preorder traversal

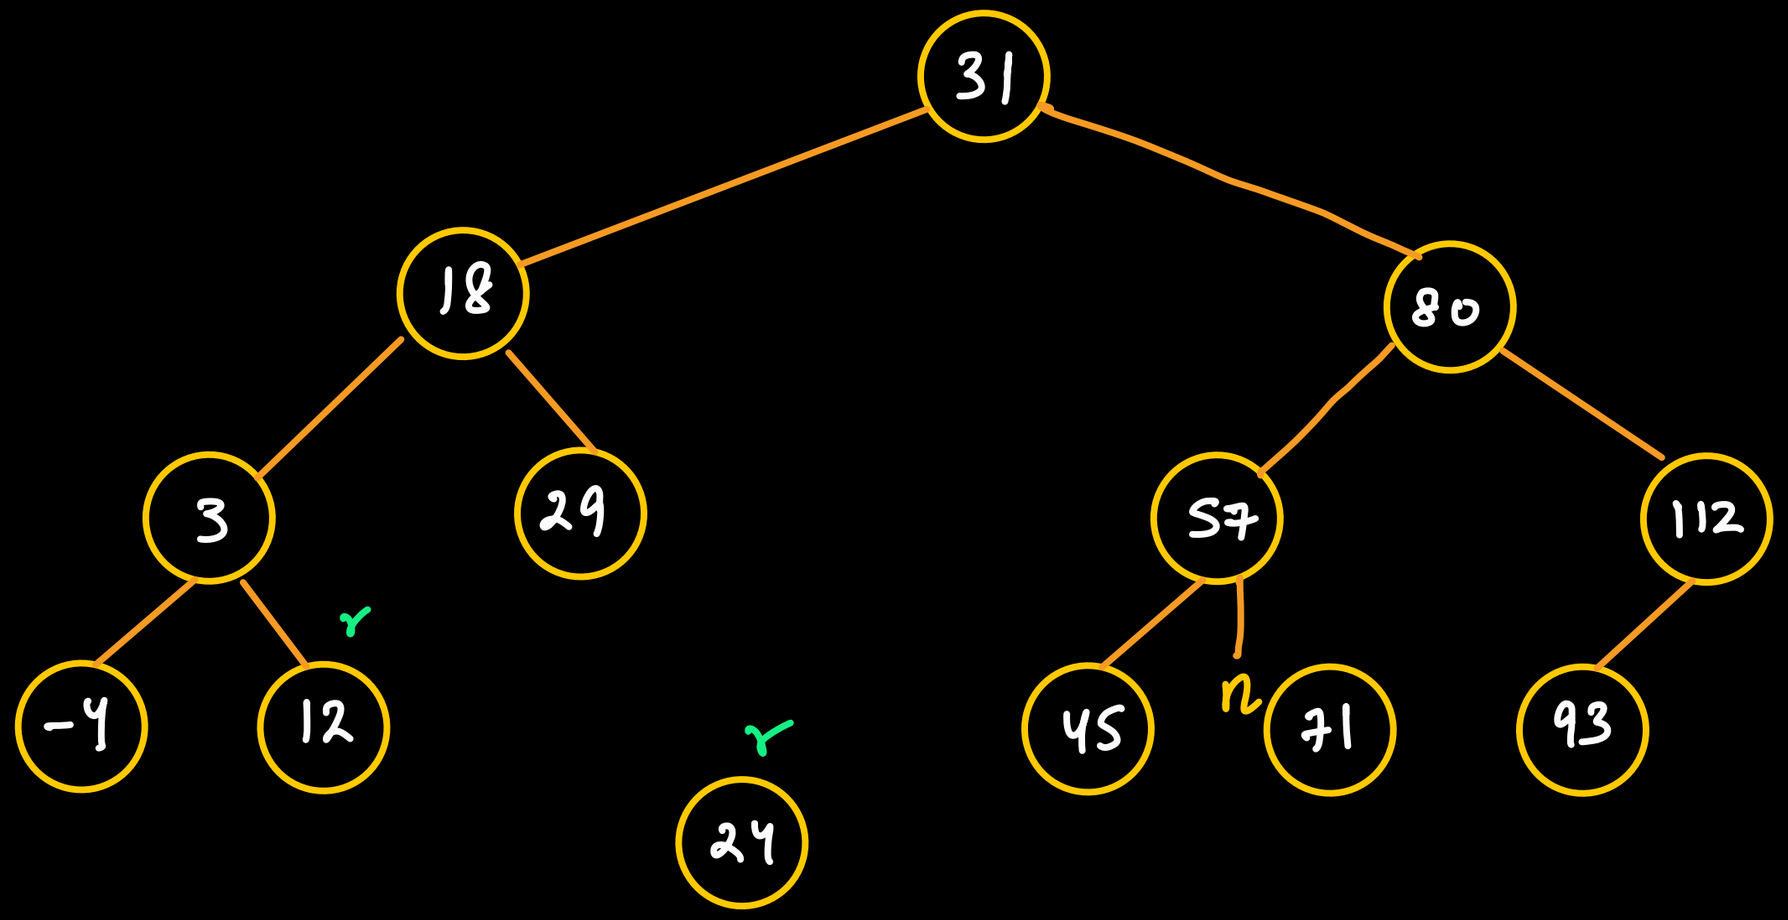
Delete Node in BST (0 child nodes)

target = 71

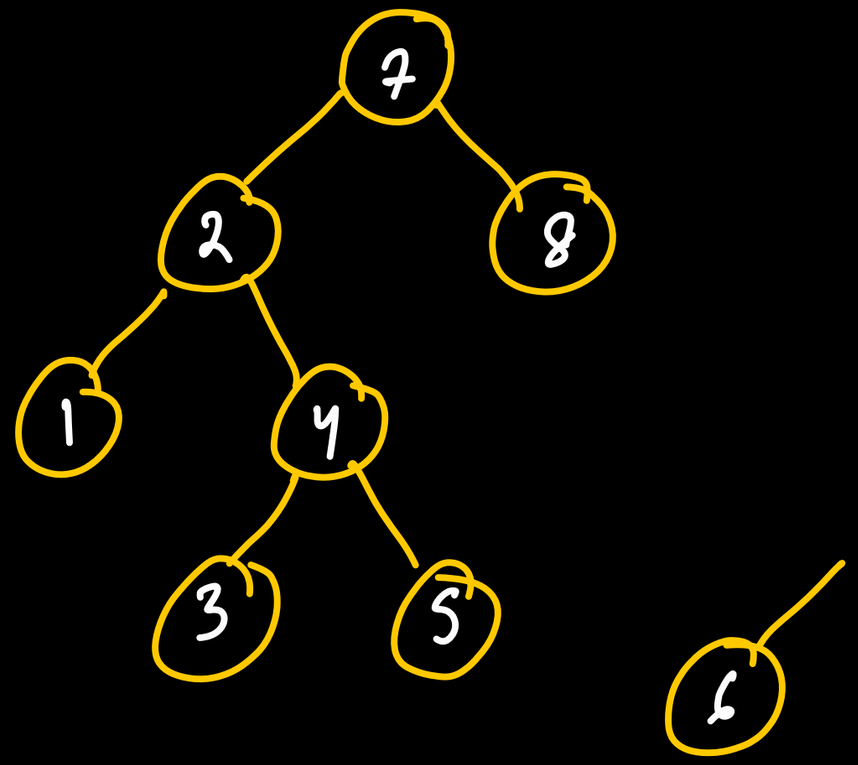


Delete Node in BST (1 child node)

target = 24



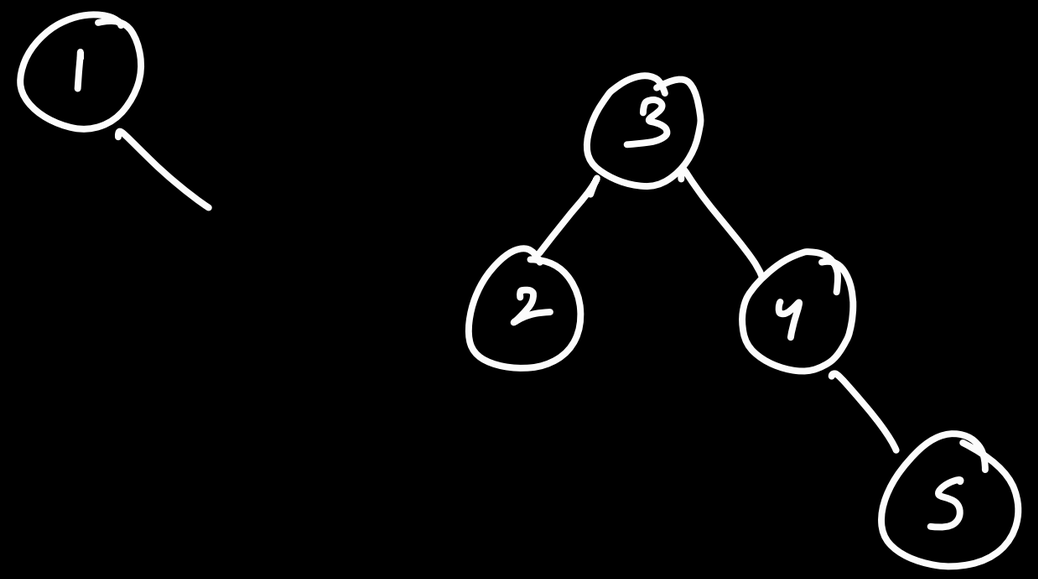
Delete Node in BST (1 child node)



target = 6

Delete Node in BST (1 child node)

delete(1)



Delete Node in BST (2 child nodes)

find pred & save it

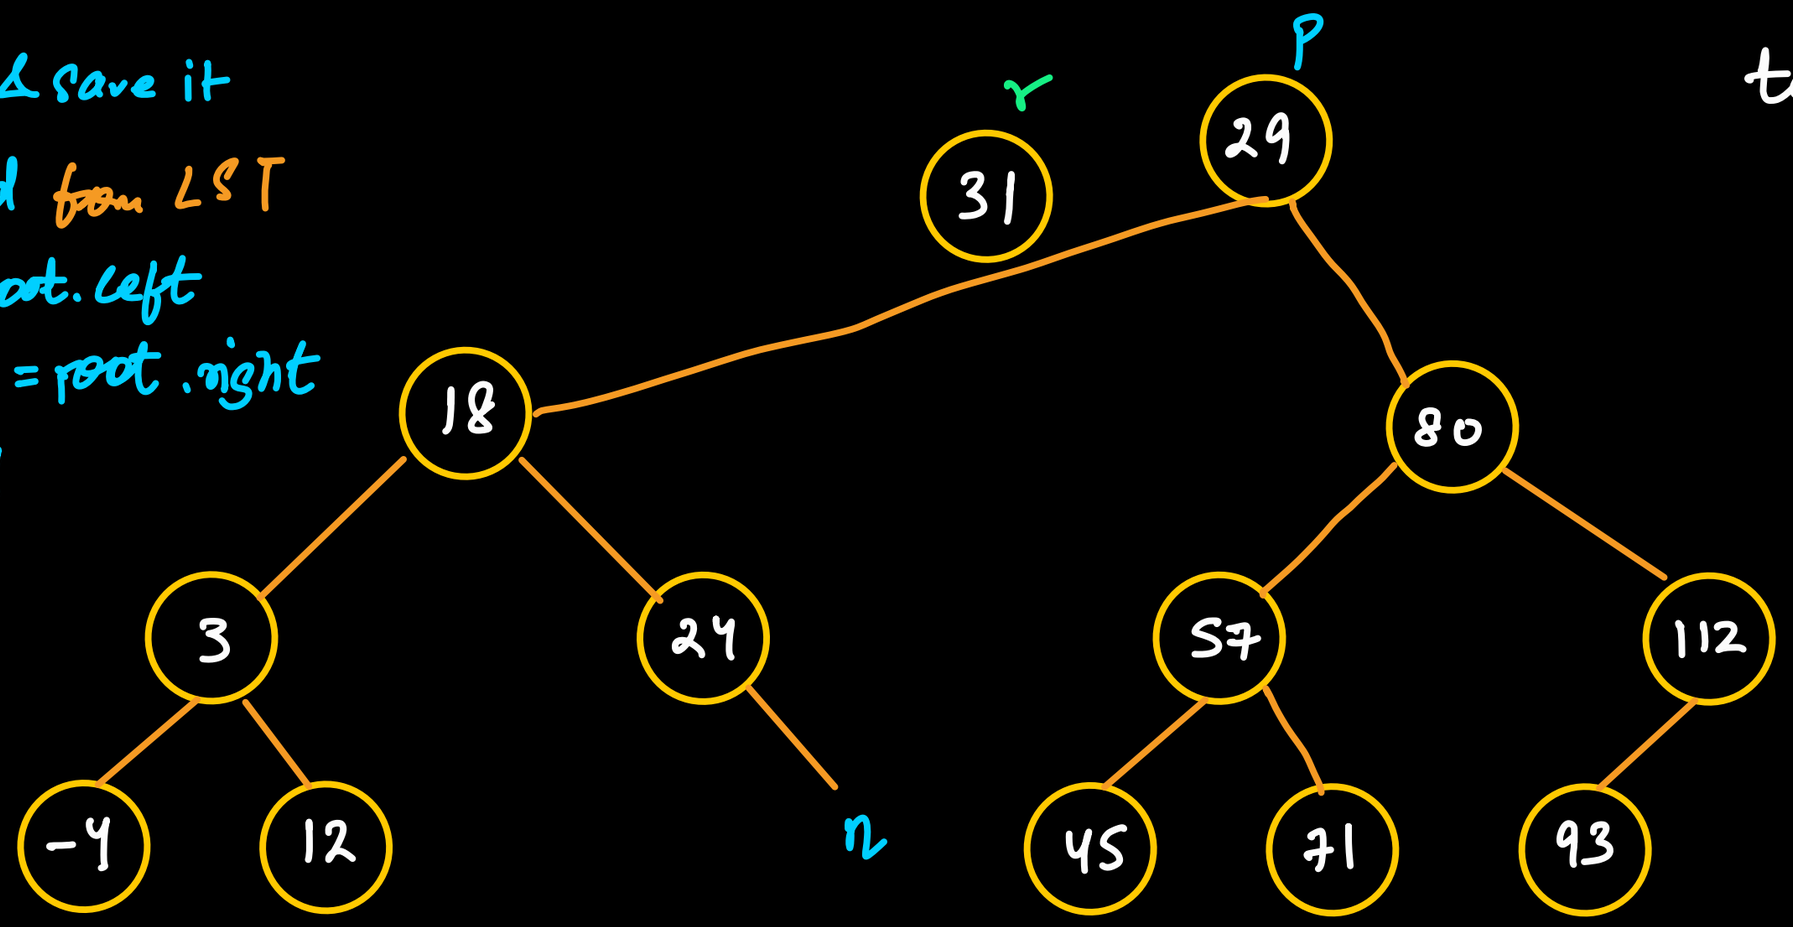
delete pred from LST

pred.left = root.left

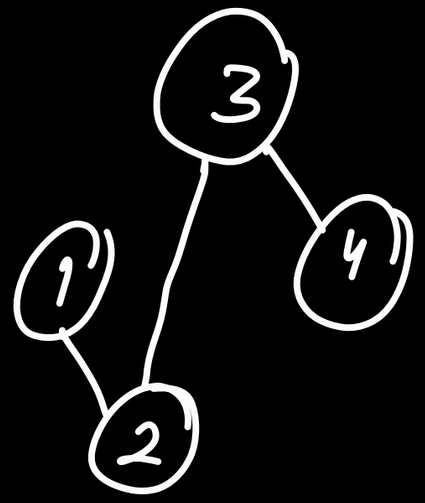
pred.right = root.right

return pred

tar = 31



Ques: Delete Node in BST



$k = 1$
