# Relational Operators $\longrightarrow$ to compare 2 quantities

## and

## boolean data type

$a > b$

$a < b$

$a \geq b$

$a \leq b$

$a \neq b$

$a == b$

$a = b$

$\downarrow$

assignment

**Ques:** Take positive integer input and tell if it is odd or even

'n' even kab hota hai?

↓  
jab ro 2 se divisible ho

```
if(n%2==0) Even  
else odd
```

**HW:** Take positive integer input and tell if it is divisible by 5 or not.

**Ques:** Take integer input and print the absolute value of that integer

$$n=5$$

$$5$$

$$n=-4$$

$$4$$

$$\begin{array}{|c|} \hline 6 \\ \hline -6 \\ \hline \end{array}$$

$n$

$$n=-n$$

**Ques:** Take real number input and check if it is an integer or not.

double x = SC..

7.2  
x

**Ques:** If cost price and selling price of an item is input through the keyboard, write a program to determine whether the seller has made profit or incurred loss or no profit no loss. Also determine how much profit he made or loss he incurred.

```
int cp = sc.nextInt();
int sp = sc.nextInt();

if (sp > cp) → profit
else loss
```

# Else If Ladder

if (cond1) — —

else if (c2) — —

else if (c3) — —

else if (c4) — —

else —

**HW:** Take length and breadth of rectangle as input and write a program to find whether the area of rectangle is greater than its perimeter.

**Ques:** Take positive integer input and print:

<u>Riya</u>	if number is divisible by 5
<u>Banu</u>	if number is divisible by 3
<u>Apurva</u>	if number is divisible by 5 & 3 both
<u>Isha</u>	if number is not divisible by 5 or 3

**HW:** Given a point  $(x, y)$ , write a program to find out if it lies in the 1st Quadrant, 2nd Quadrant, 3rd Quadrant, 4th Quadrant, on the x-axis, y-axis or at the origin.

# Multiple Conditions using `&&` and `||`

*logical and*

*logical or*

**Ques:** Take positive integer input and tell if it is a four digit number or not.

$n = 23 \rightarrow$  not a 4 digit no

$n = 1484 \rightarrow$  4 digit no.

if ( $n > 999$  and  $n < 10000$ )  
 $\downarrow$   
 11

$1484/10$

$= 148/10$

$14/10$

$1/10$

0

$23/10$

$2/10$

0

**HW:** Take integer input and tell if its magnitude is smaller than 69 or not.

$$n = -34$$

$$|-34| < 69$$

**Ques:** Take positive integer input and tell if it is divisible by 5 or 3.

3, 5, 6, 9, 10, 12, 15, 18, 20, 21, 24, 25, 27, 30 ...

```
if( n%5==0 || n%3==0 )  
    |  
    ||
```

**Ques:** Take 3 positive integers input and tell if they can be the sides of a triangle or not.

$$a + b > c$$

$$b + c > a$$

$$c + a > b$$

**Ques:** Take 3 positive integers input and print the greatest of them.

**HW:** Take 3 positive integers input and print the least of them.

# Nested If-Else

```

if ( ) {
    if ( ) —
    else —
}
else {
    if ( ) —
    else —
}

```

**Ques:** Take 3 positive integers input and print the greatest of them.  $a, b, c$

```
if(a>b){ // b to max nahi hai
```

```
    if(a>c) sout(a)
```

```
    else sout(c)
```

```
}
```

```
else{ // b>a iska matlab a to max nahi hai
```

```
    if(b>c) sout(b)
```

```
    else sout(c)
```

```
}
```

# Ternary Operator

## condition ? sach : jhoot

↓ If-Else ka shortcut

↓ If-Else ko cool tareeke se likhne ka tareeka

**Ques:** Take positive integer input and tell if it is odd or even

Greatest of three 

```

if(a>b){
    if(a>c) sout(a)
    else sout(c)
}
else{ // b>a
    if(b>c) sout(b)
    else sout(c)
}

```

$(a > b) ? ((a > c) ? a : c) : ((b > c) ? b : c);$
