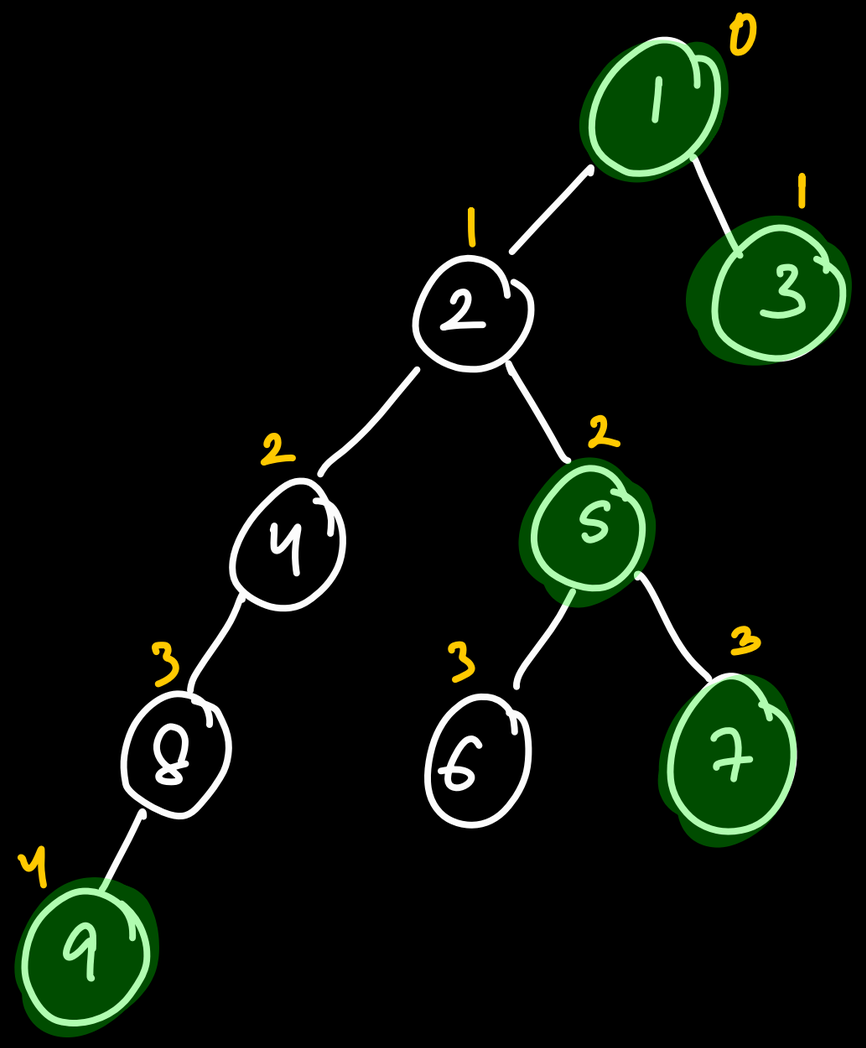
Ques: Right View of Binary Tree



1 2 4 8 9 5 6 7 3

ans =

0	1	2	3	4
1	3	5	7	9

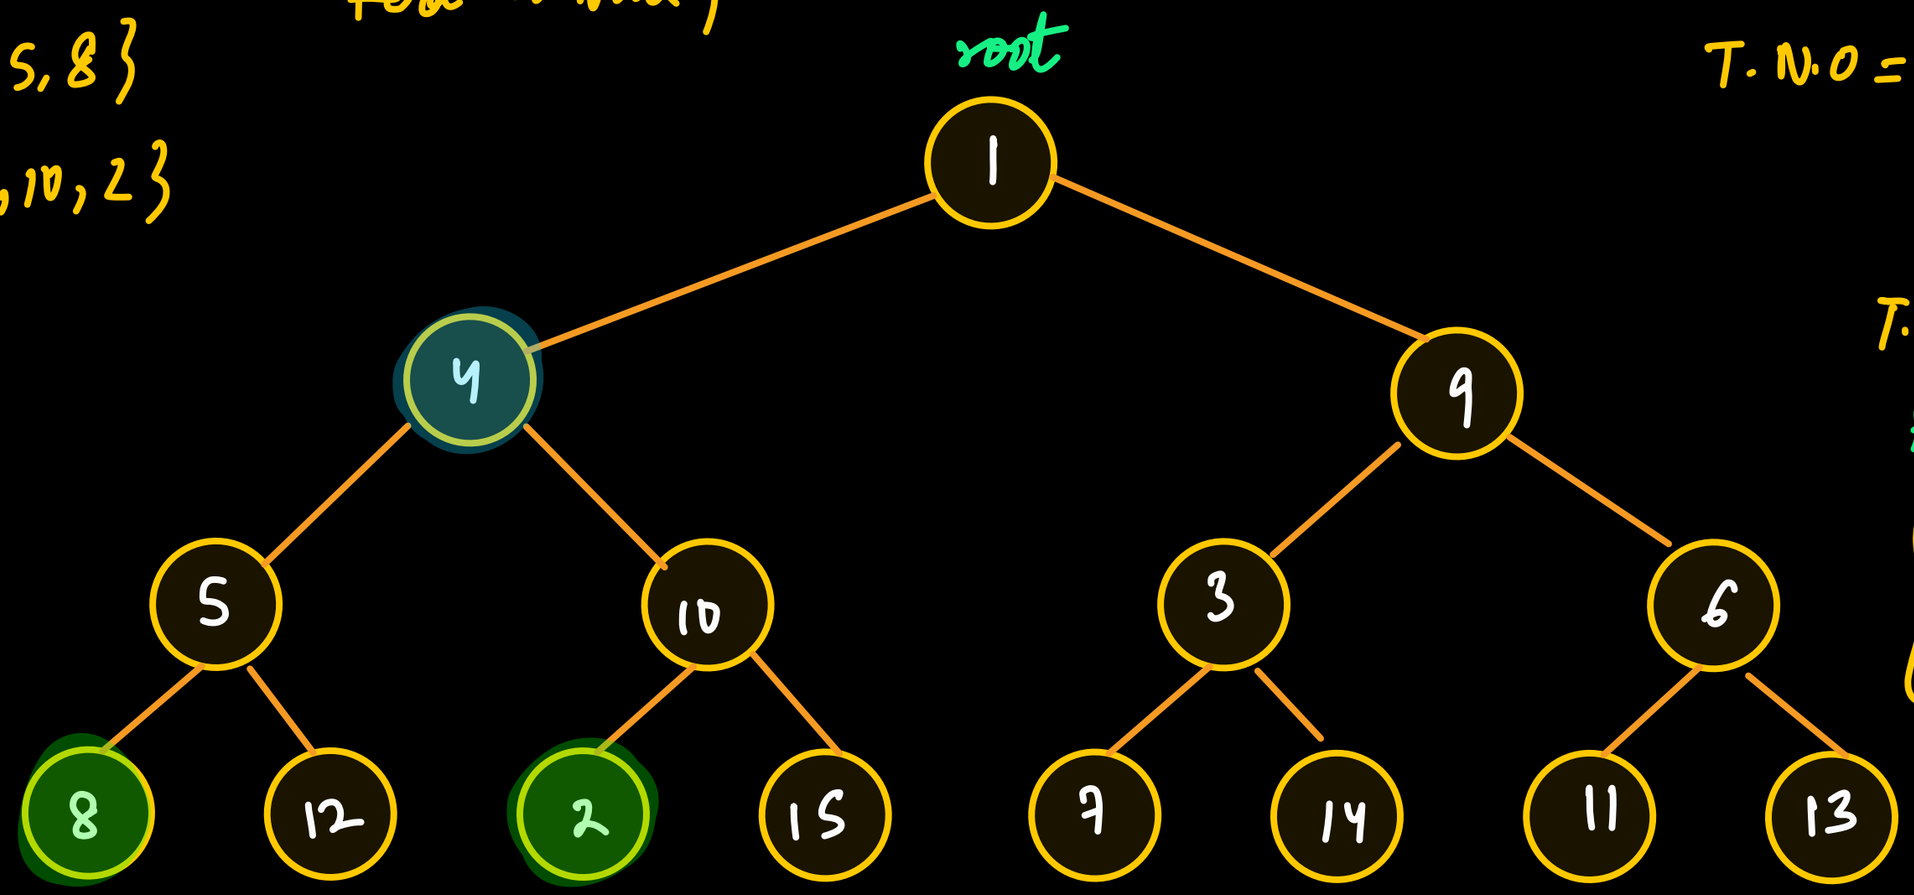
HW: Left View of Binary Tree

Ques: Lowest Common Ancestor

Root to Node path

{1, 4, 5, 8}

{1, 4, 10, 2}



$p = 8, \; q = 12$

$T.N.O = n + \frac{n}{2} + \frac{n}{4} \ldots 1$

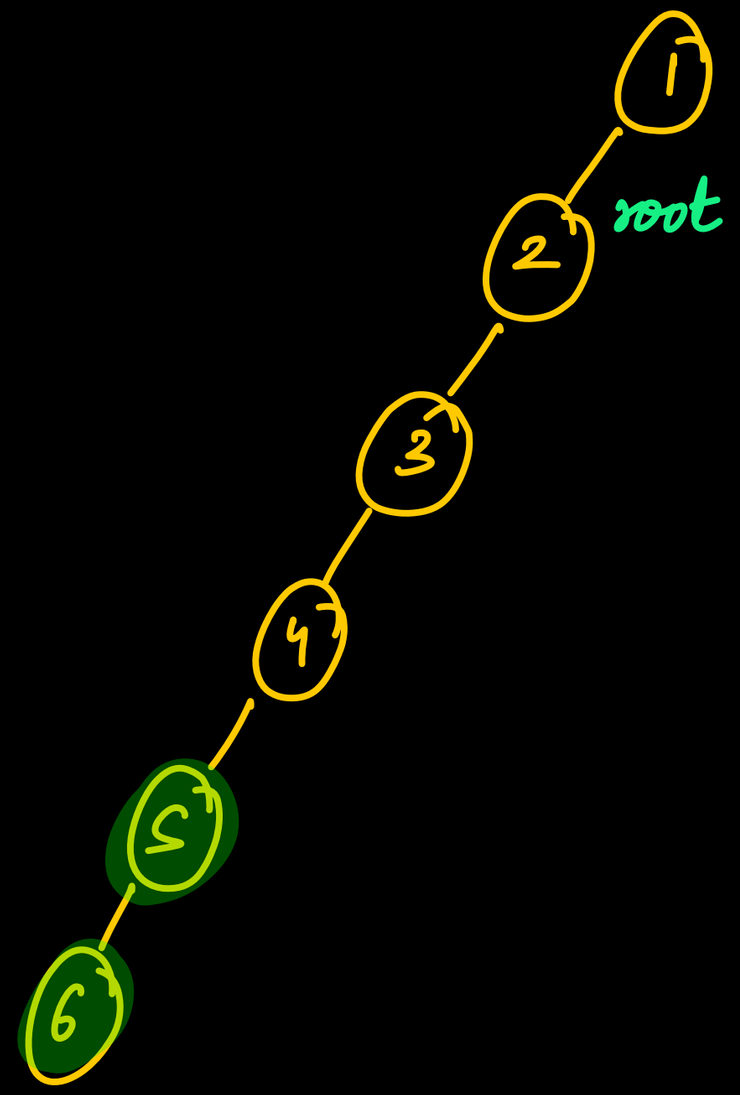
$\approx 2n$

$T.C. = O(n)$

Best Case

[Tree is Balanced]

Ques: Lowest Common Ancestor



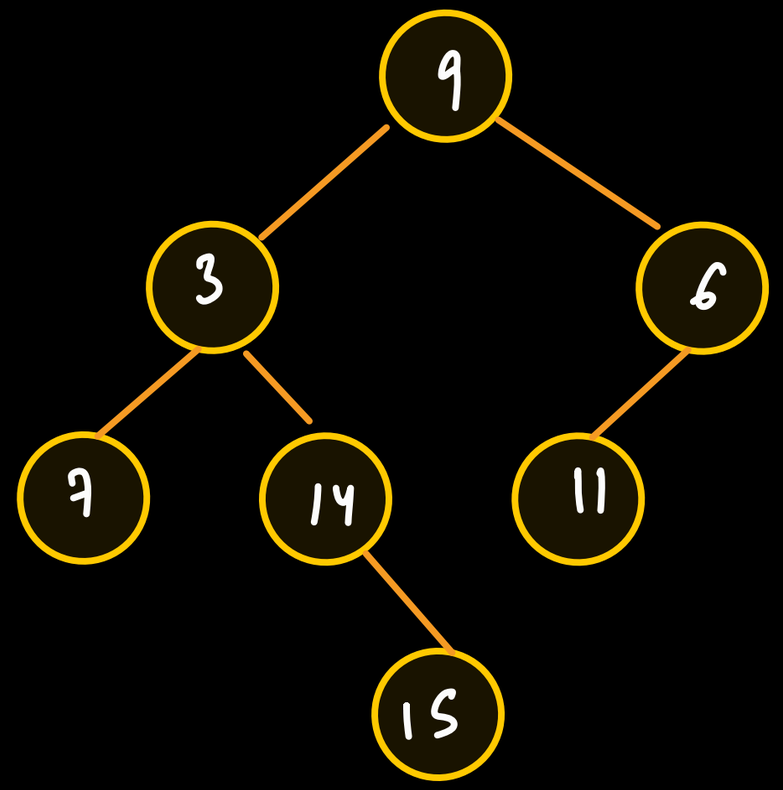
$n + n-1 + n-2 \cdots 1$

$T.C. = O(n^2)$

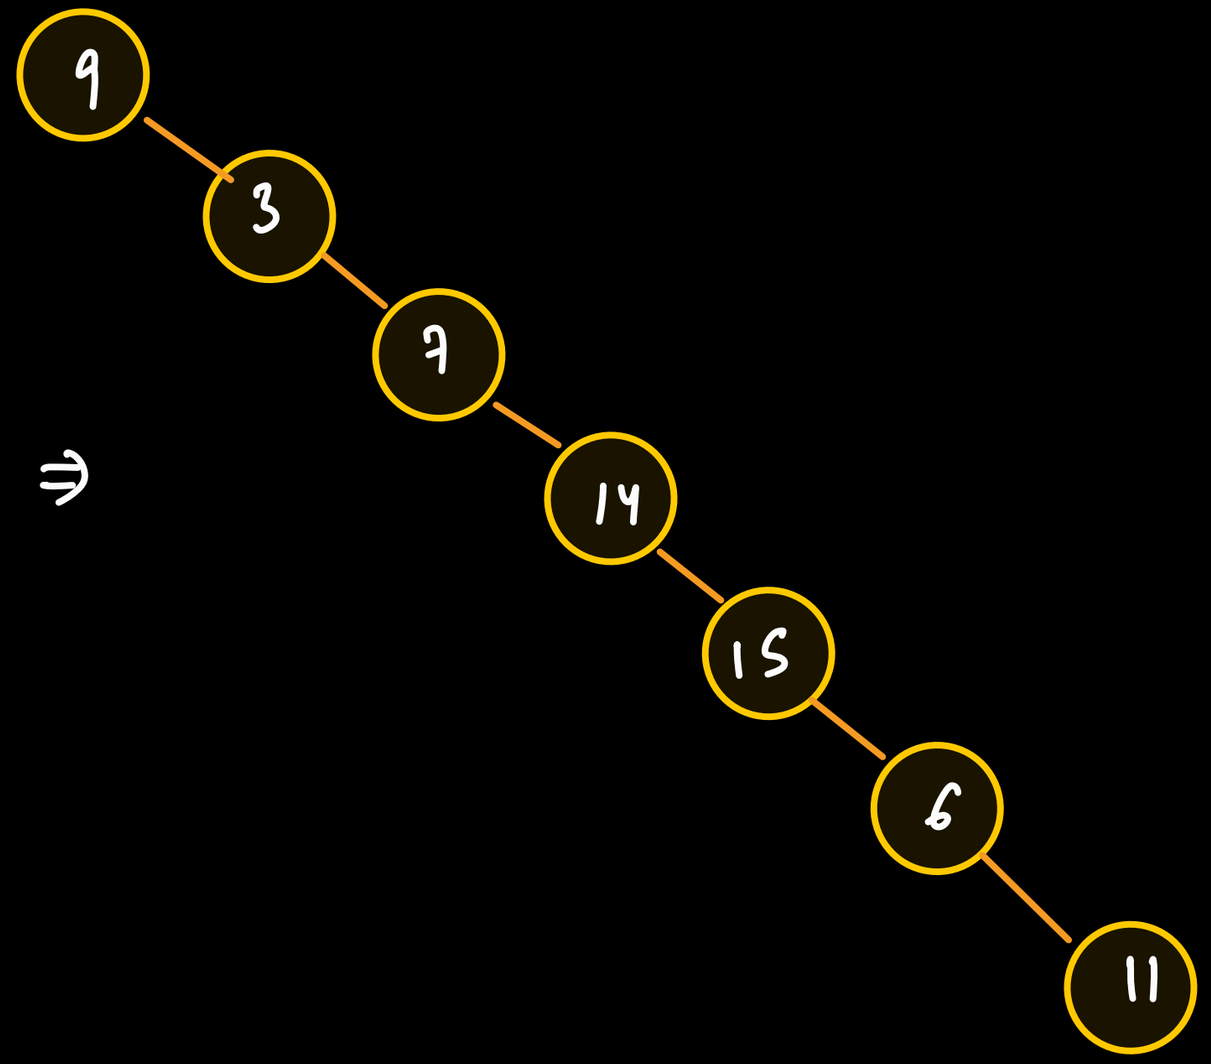
Worst > Avg. Case

Ques: Min Distance between 2 given Nodes in a Binary Tree

Ques: Flatten Binary Tree to Linked List

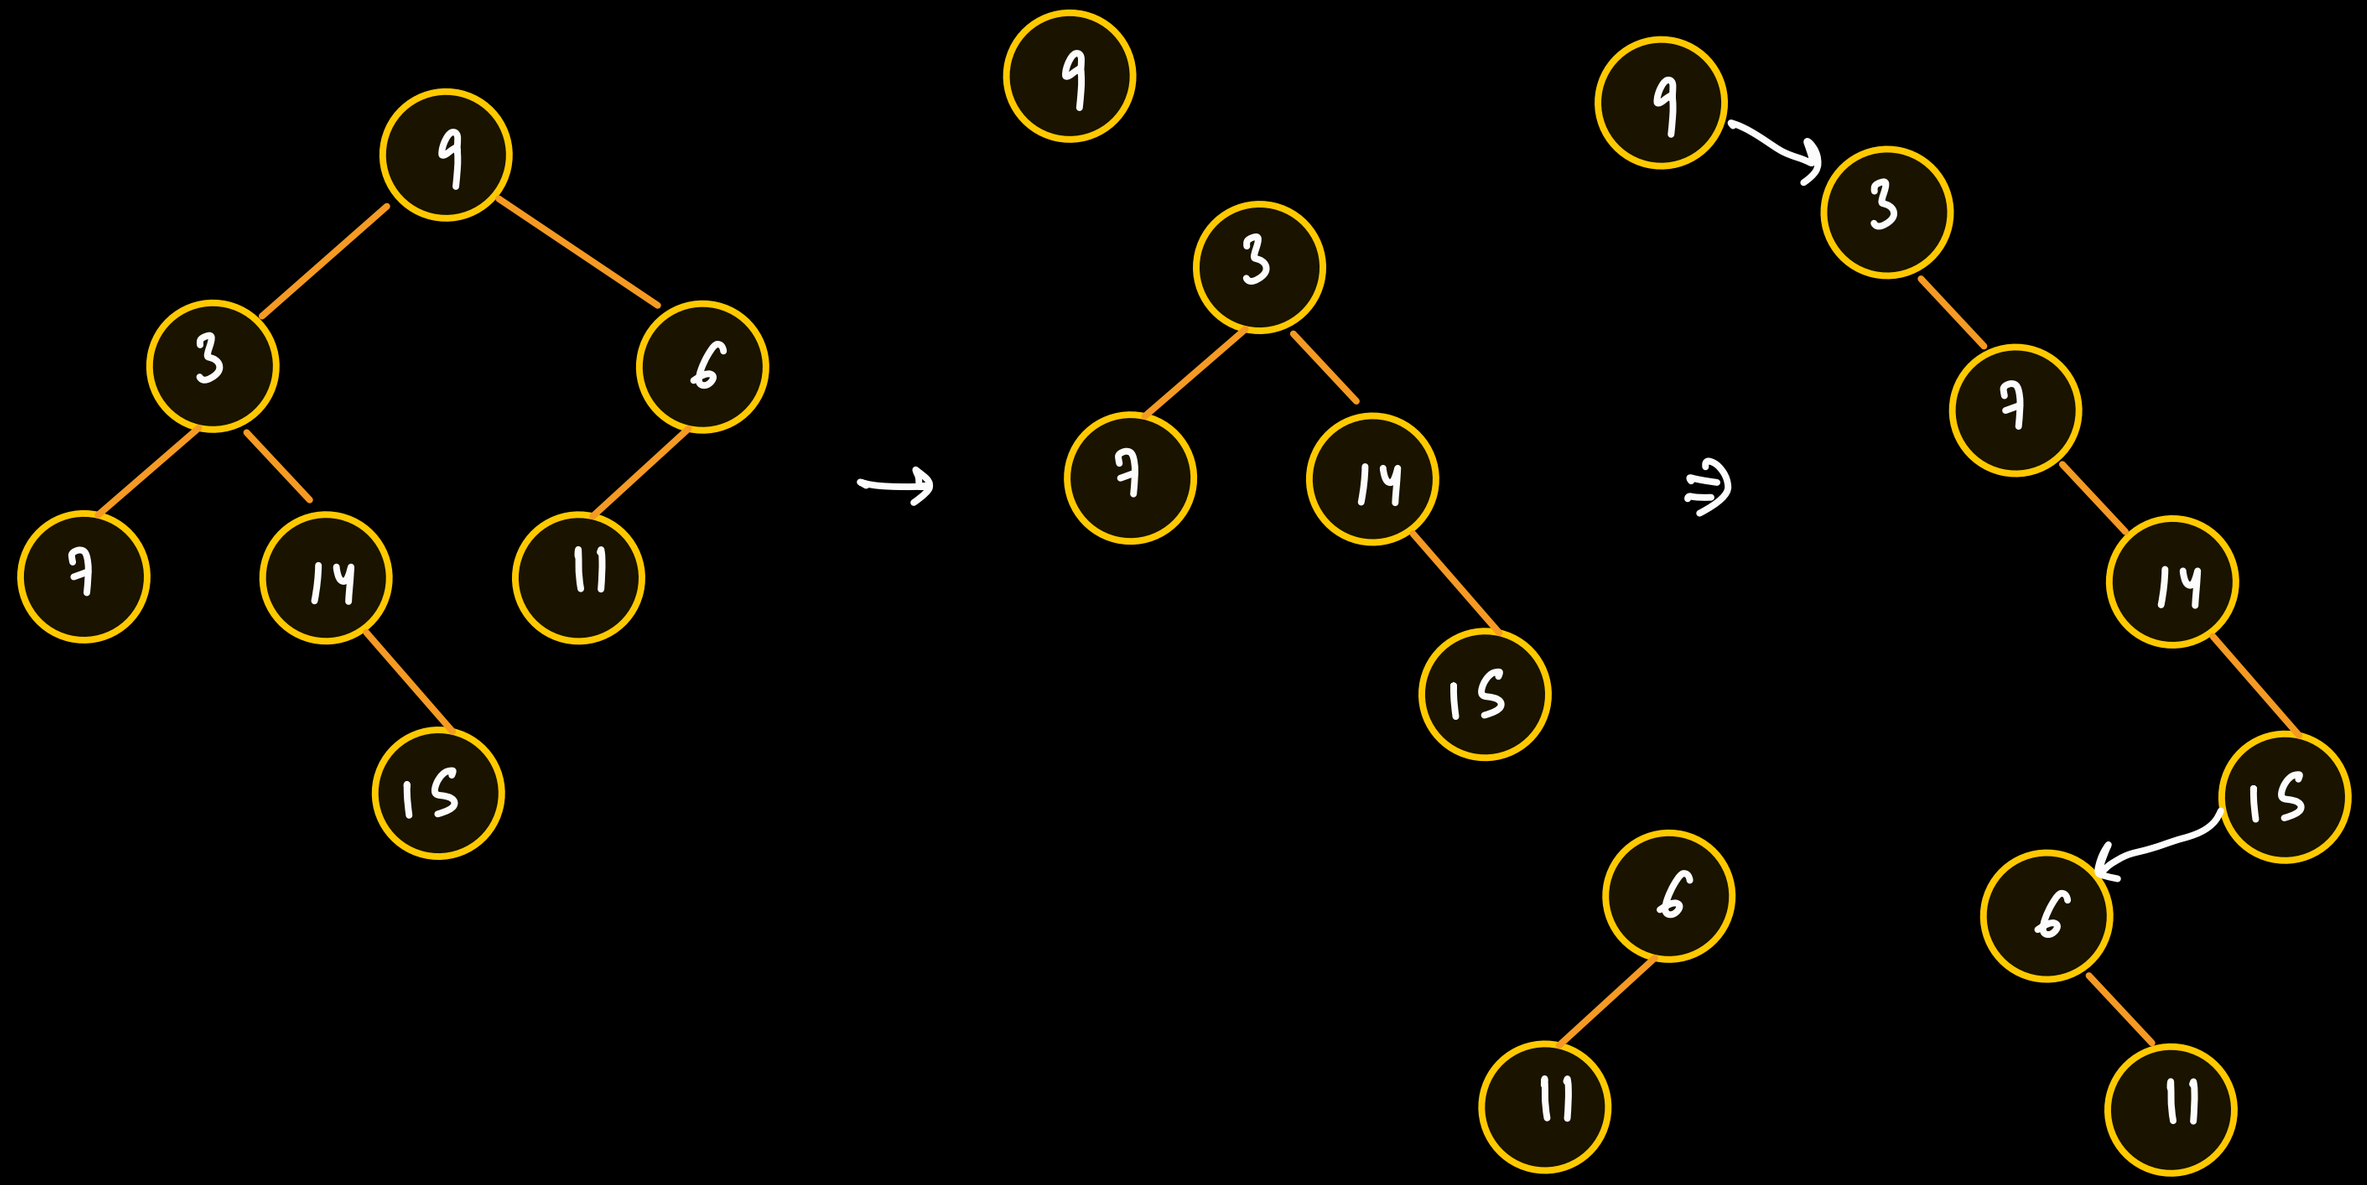


⇒

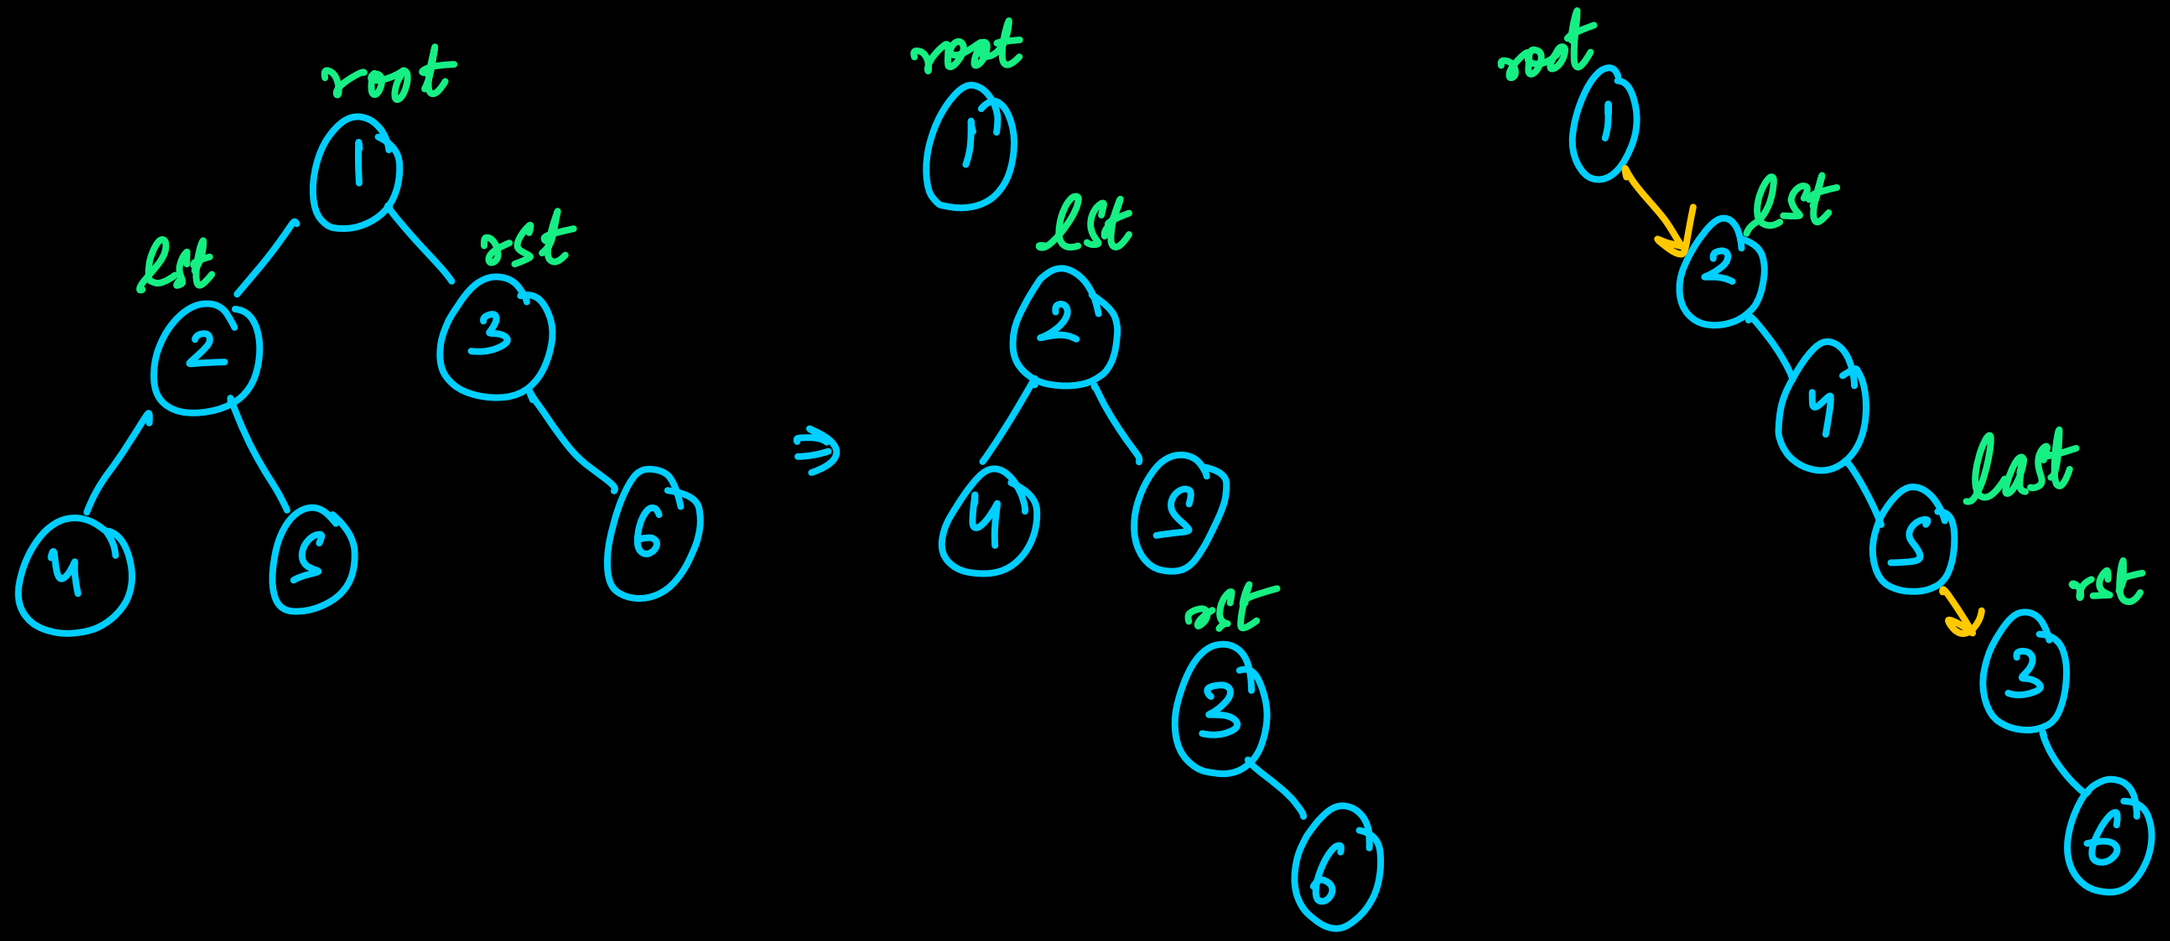


arr = { 9 3 7 14 15 6 11 }

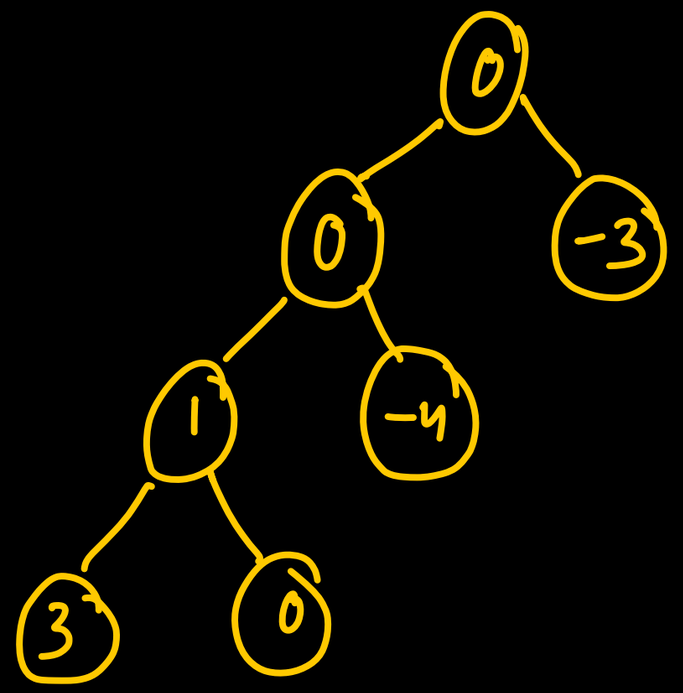
Ques: Flatten Binary Tree to Linked List



Ques: Flatten Binary Tree to Linked List



Ques: Paths from root with a specified sum



Sum = 1
