Morris Traversal → inorder of BT

$\boxed{A.S. = O(1)}$

$\boxed{T.C. = O(n)}$

Concept of Linking & Unlinking

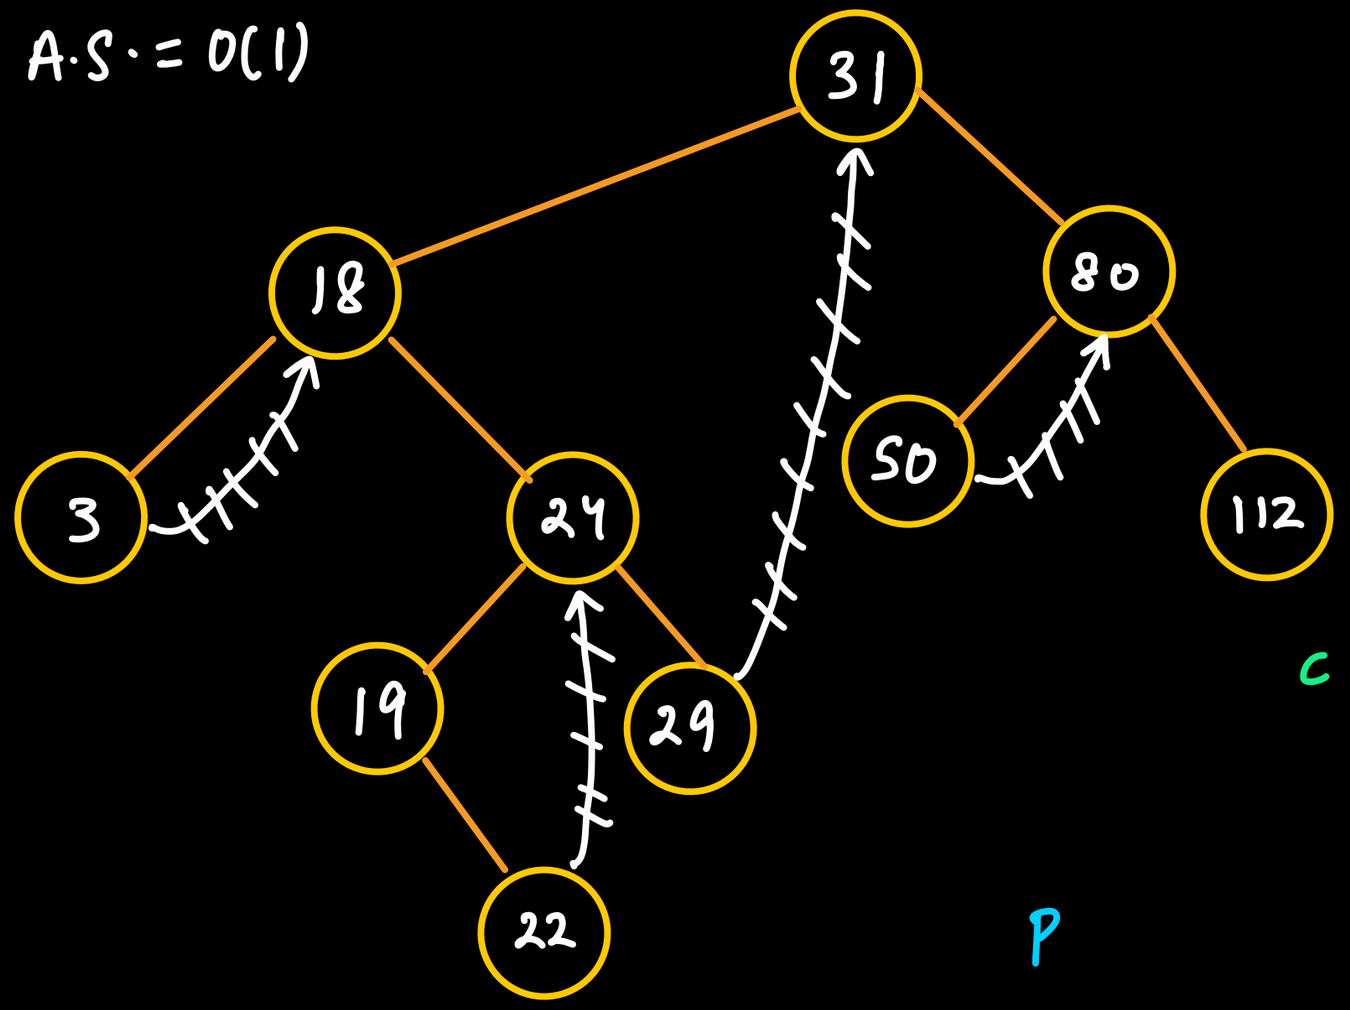
We need inorder pred

3 18 19 22 24 29 31 50 80 112

Morris Traversal

T.C. = O(n)

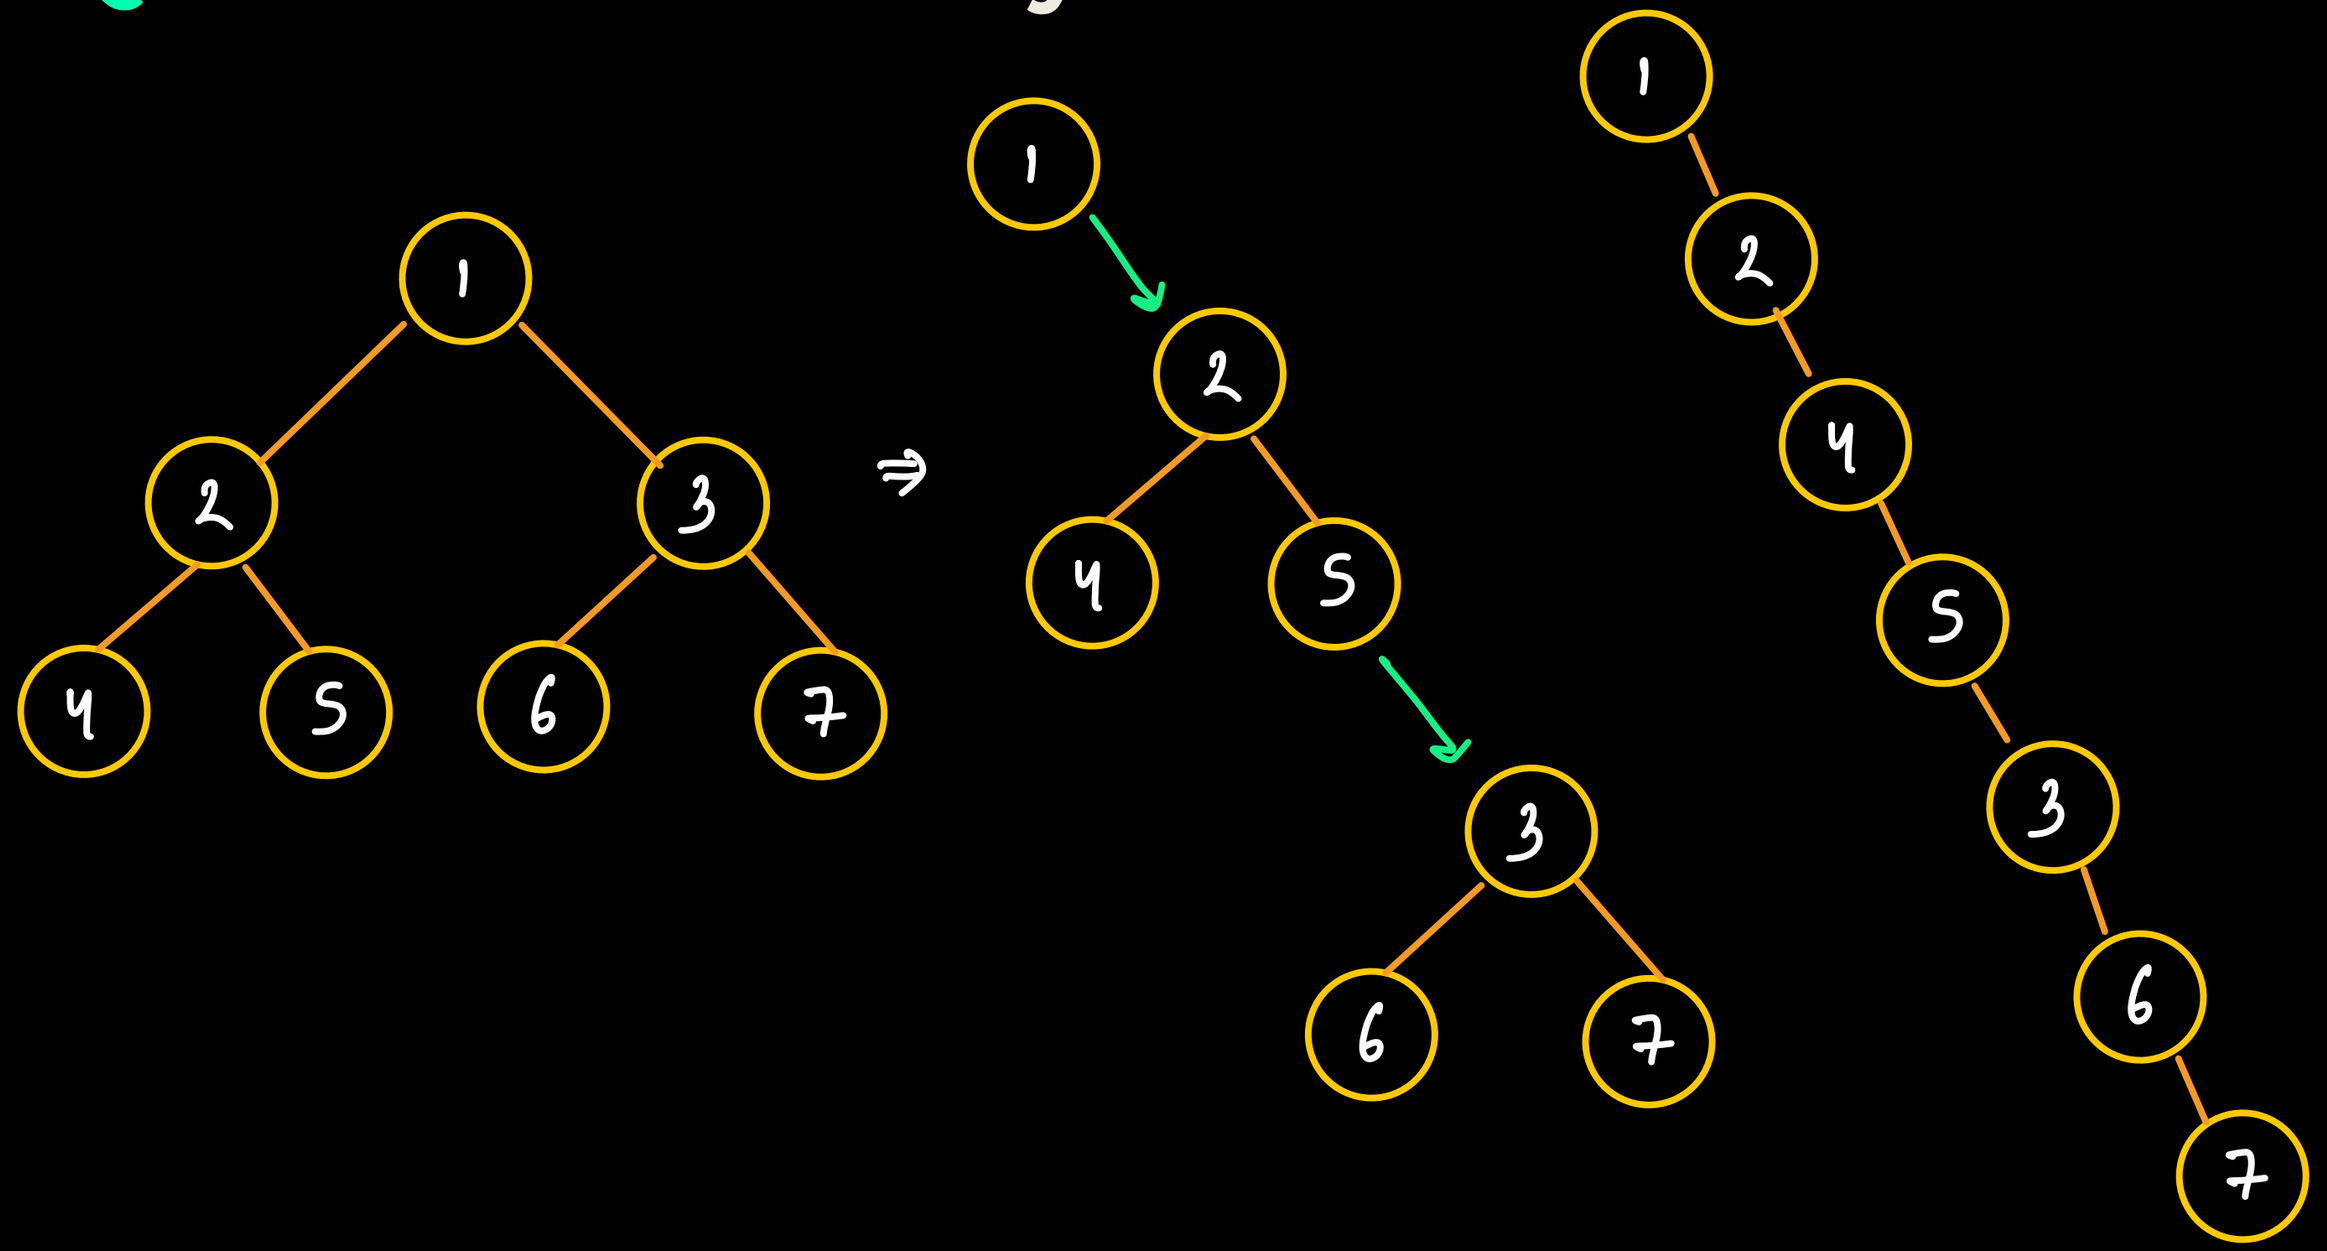
A.S. = O(1)



```
Node curr = root;
while(curr != null){
    if(curr.left != null){
        // find pred and do work
        Node pred = curr.left;
        while(pred.right != null && pred.right != curr)
            pred = pred.right;
        if(pred.right == null){ // link
            pred.right = curr;
            curr = curr.left;
        }
        else{ // pred.right = curr // Unlink & Print
            pred.right = null;
            ans.add(curr.data);
            curr = curr.right;
        }
    }
    else{
        ans.add(curr.data);
        curr = curr.right;
    }
}
```

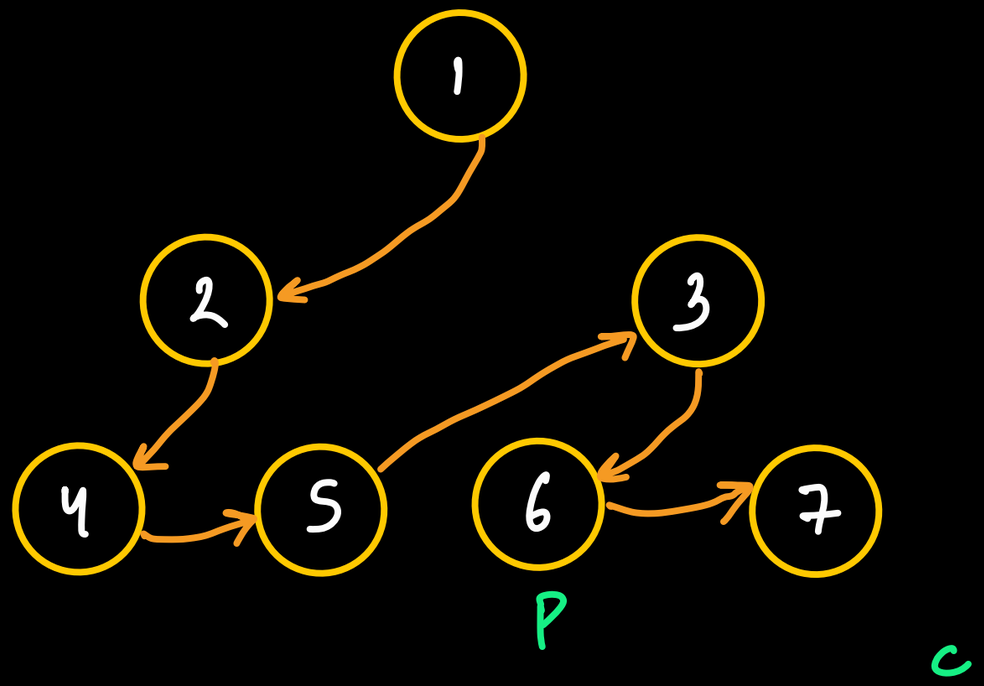
pred ka right nahi hoga

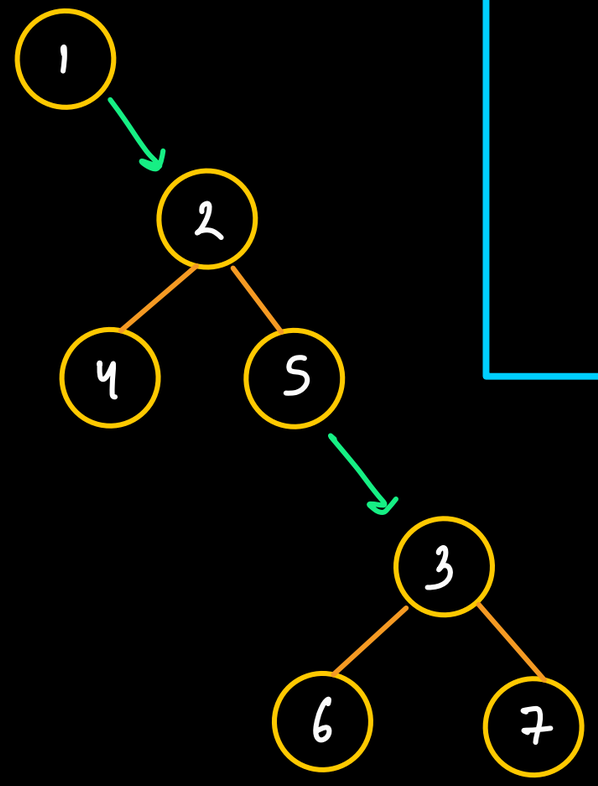
Ques: Flatten Binary Tree to Linked List



Ques: Flatten Binary Tree to Linked List

Moris Traversal (Modified)





1) pred nikalo

2) fargi connection

p.right = c.right

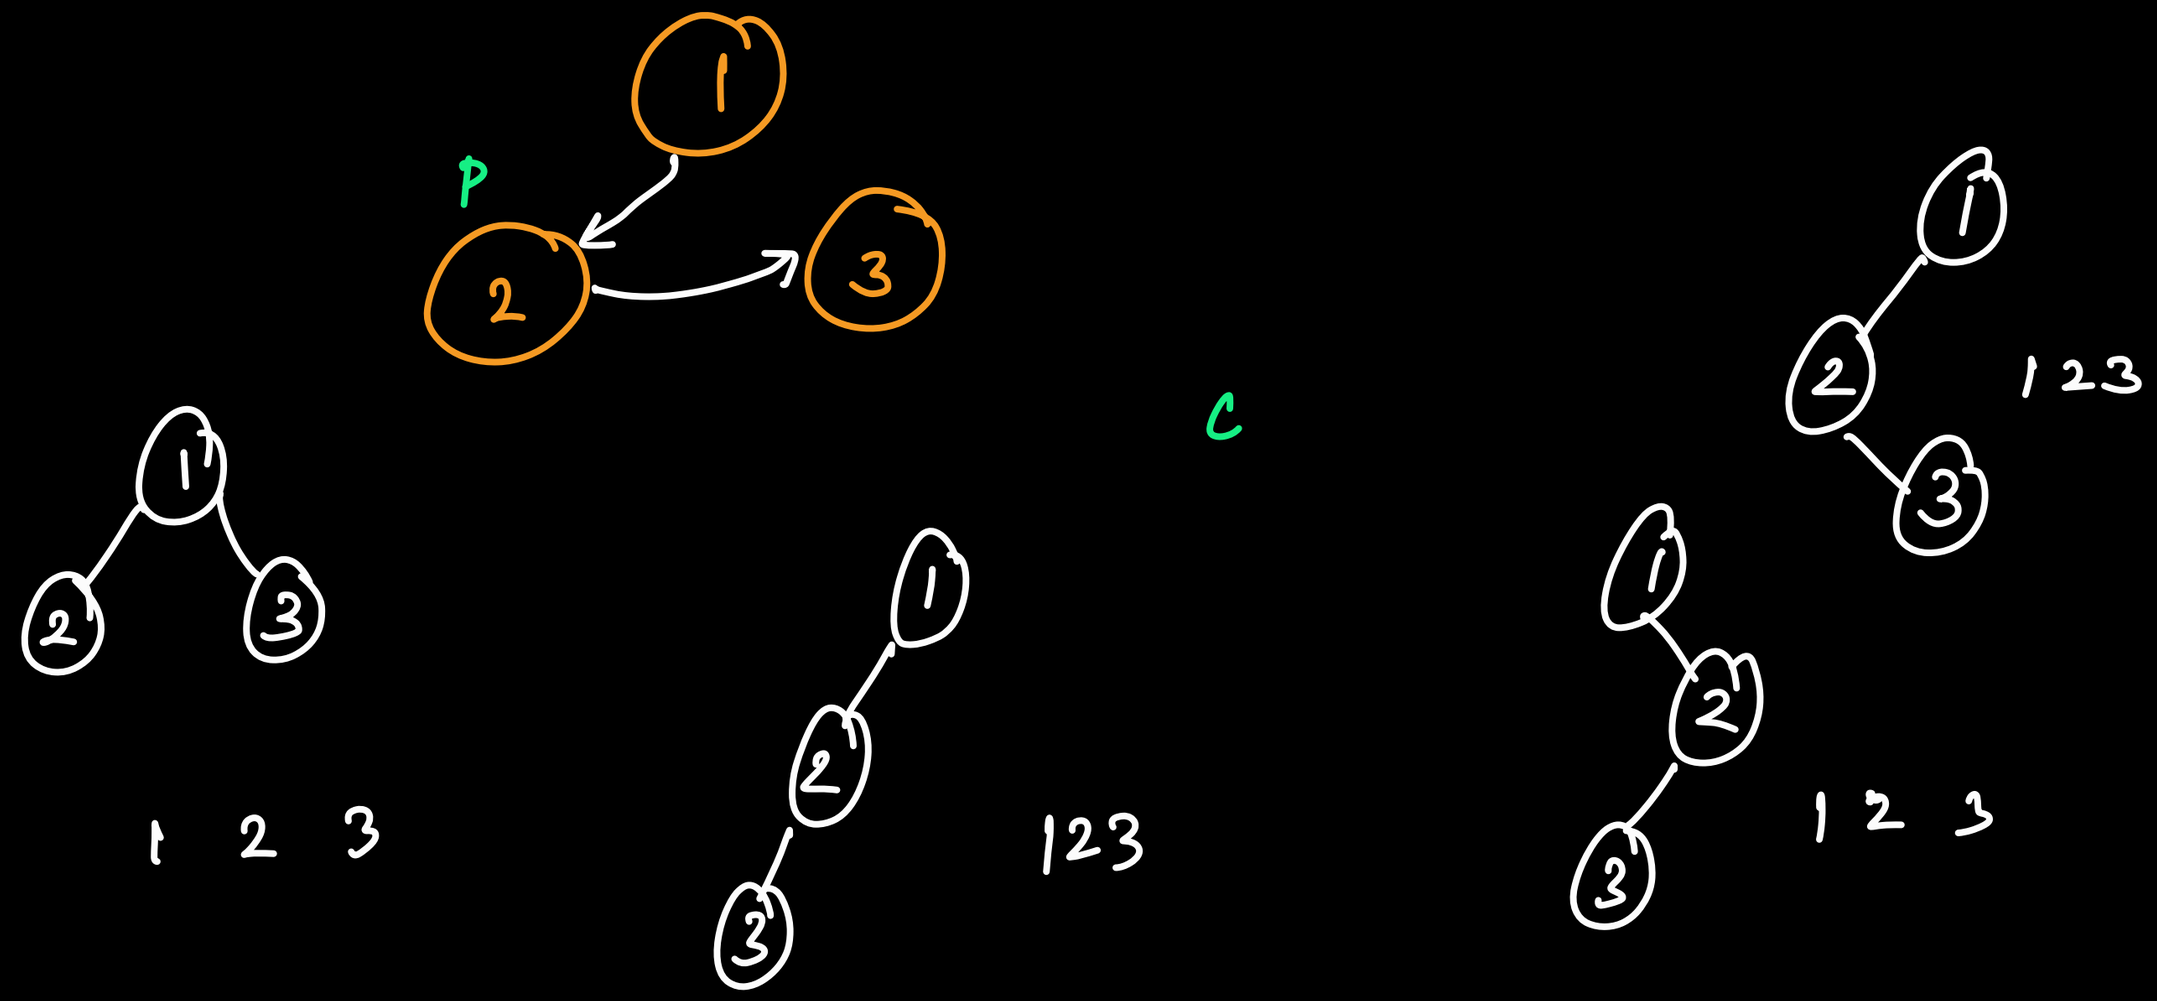
c.right = c.left

c.left = null

c = c.right

$\boxed{c = c.right}$

left blue

right orange


Ques: Flatten Binary Tree to Linked List
