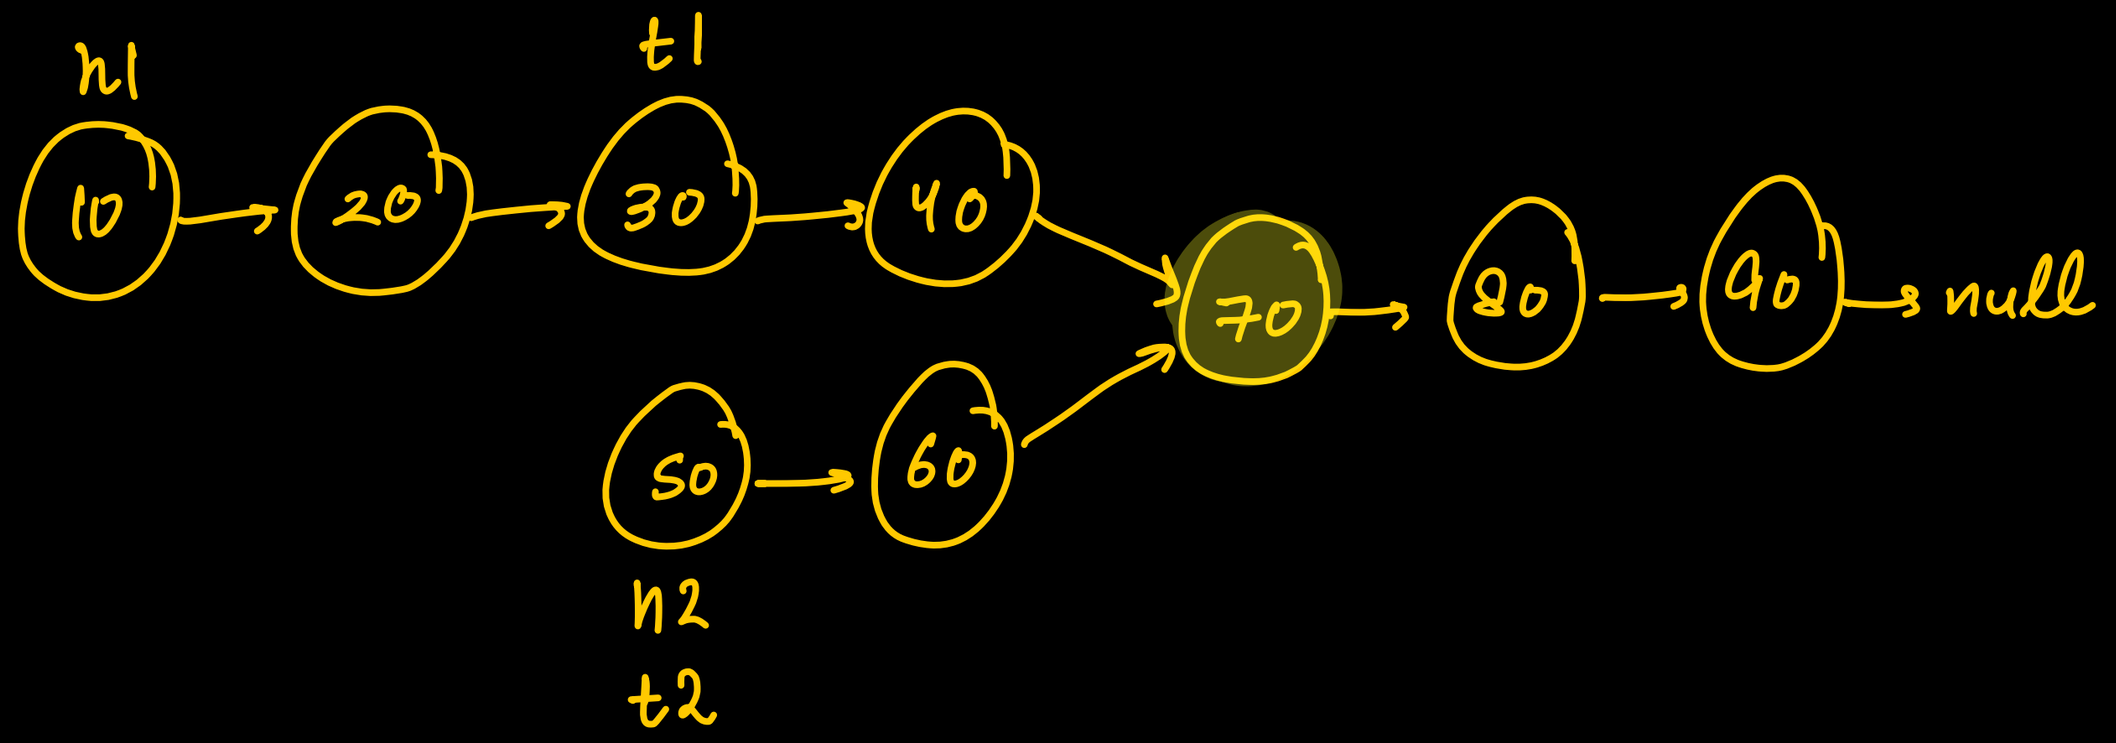
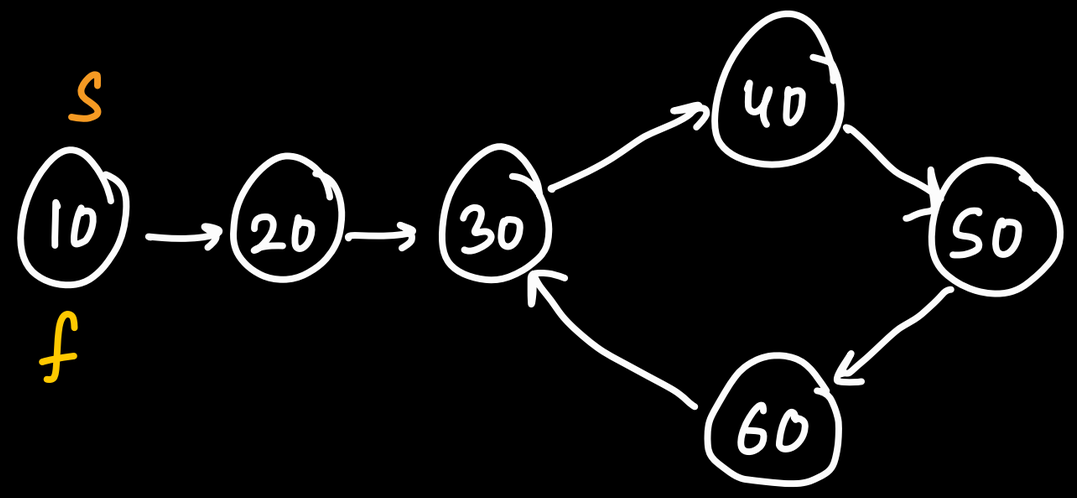
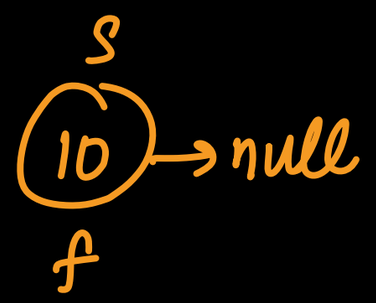
Ques: Intersection of Two Linked Lists

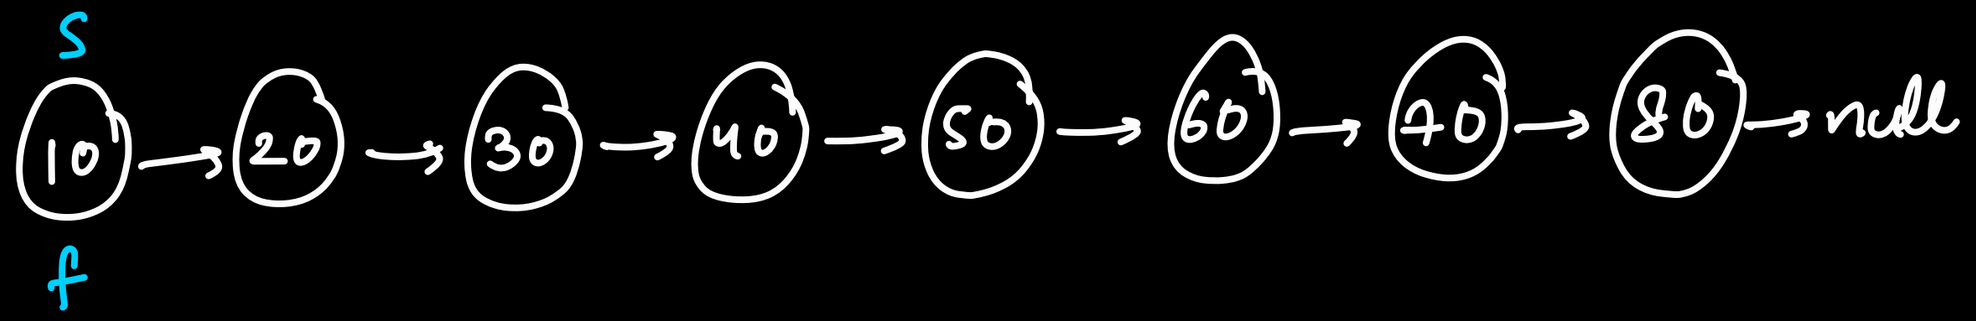


Leetcode 160

Ques: Detect loop in Linked List

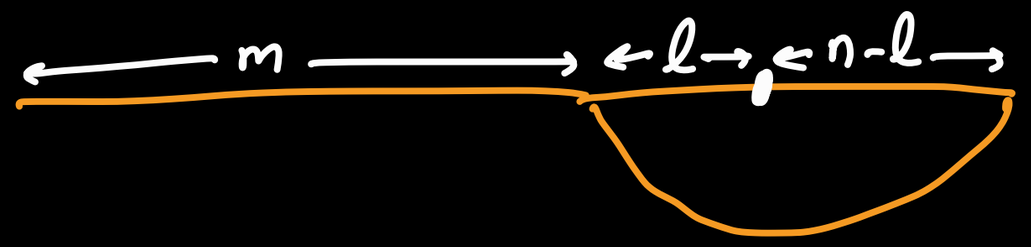






Ques: Detect loop in Linked List

Proof:



n = length of loop

$m+n$ length of ll

slow → x ⇒ $m+l$ distance

fast → 2x ⇒ $m + n + l$ distance

$$m + n + l = 2(m + l)$$

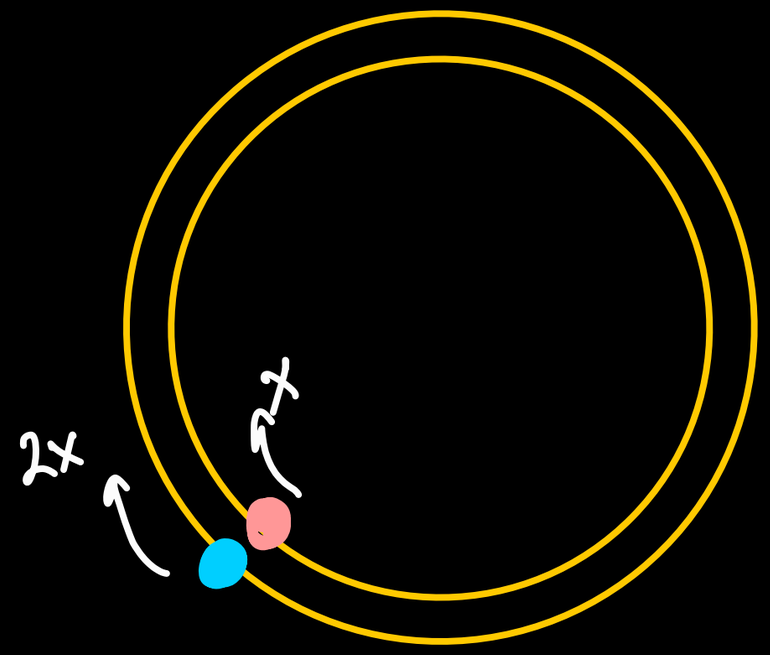
$$m + n + l = 2m + 2l$$

$$n = m + l \Rightarrow \boxed{l = n - m}$$

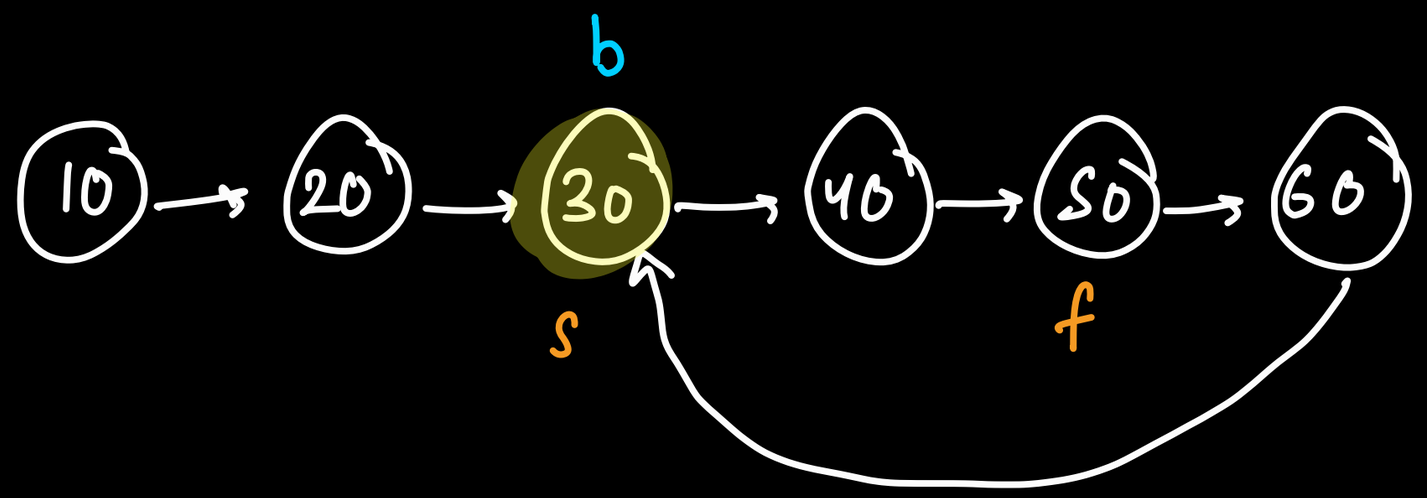
$m = n - l$

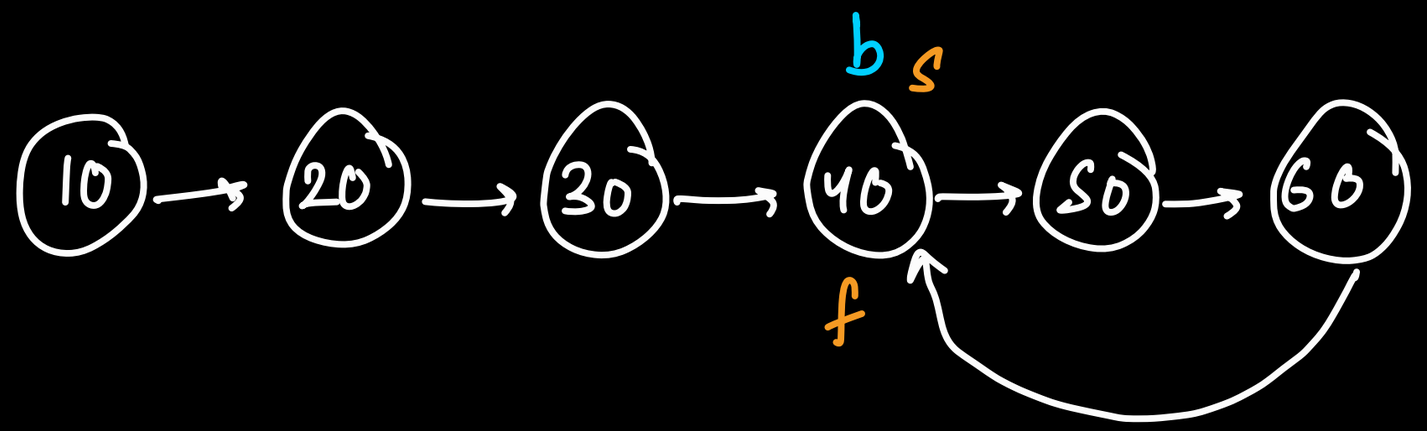
integer

Ques: Detect loop in Linked List

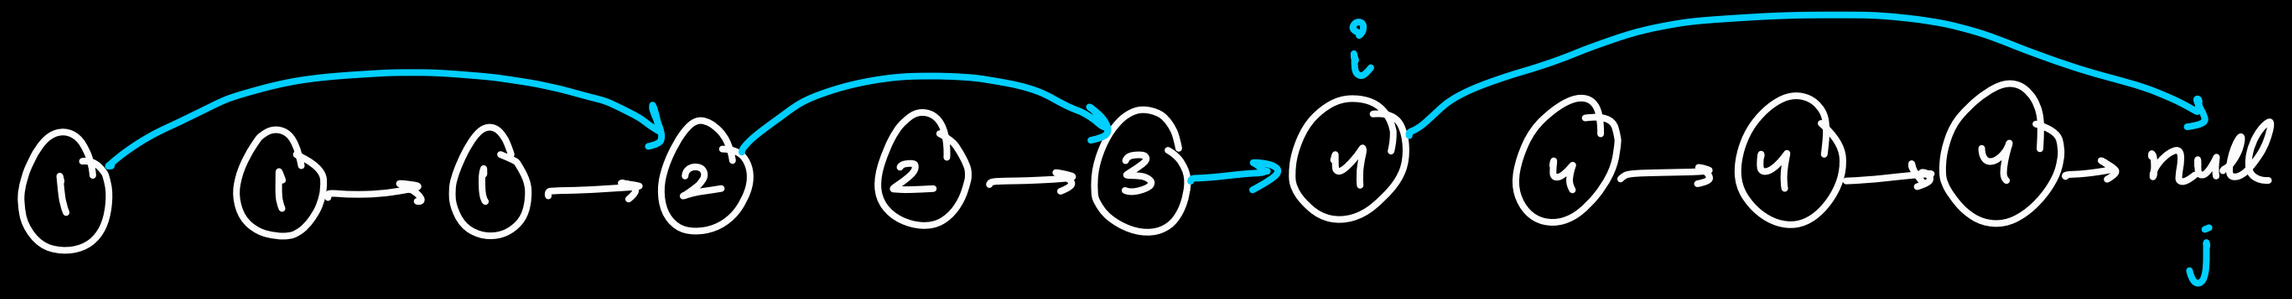


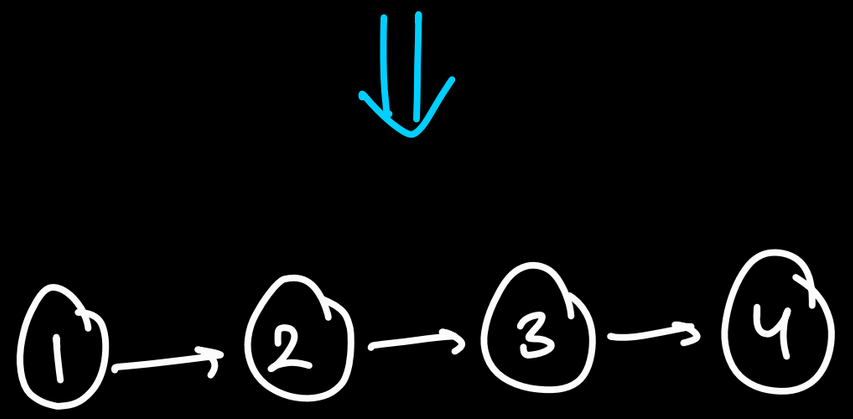
Ques: Find the first Node of loop in Linked List





Ques: Remove duplicates from sorted LL.





H.W. Remove duplicates from sorted list II
