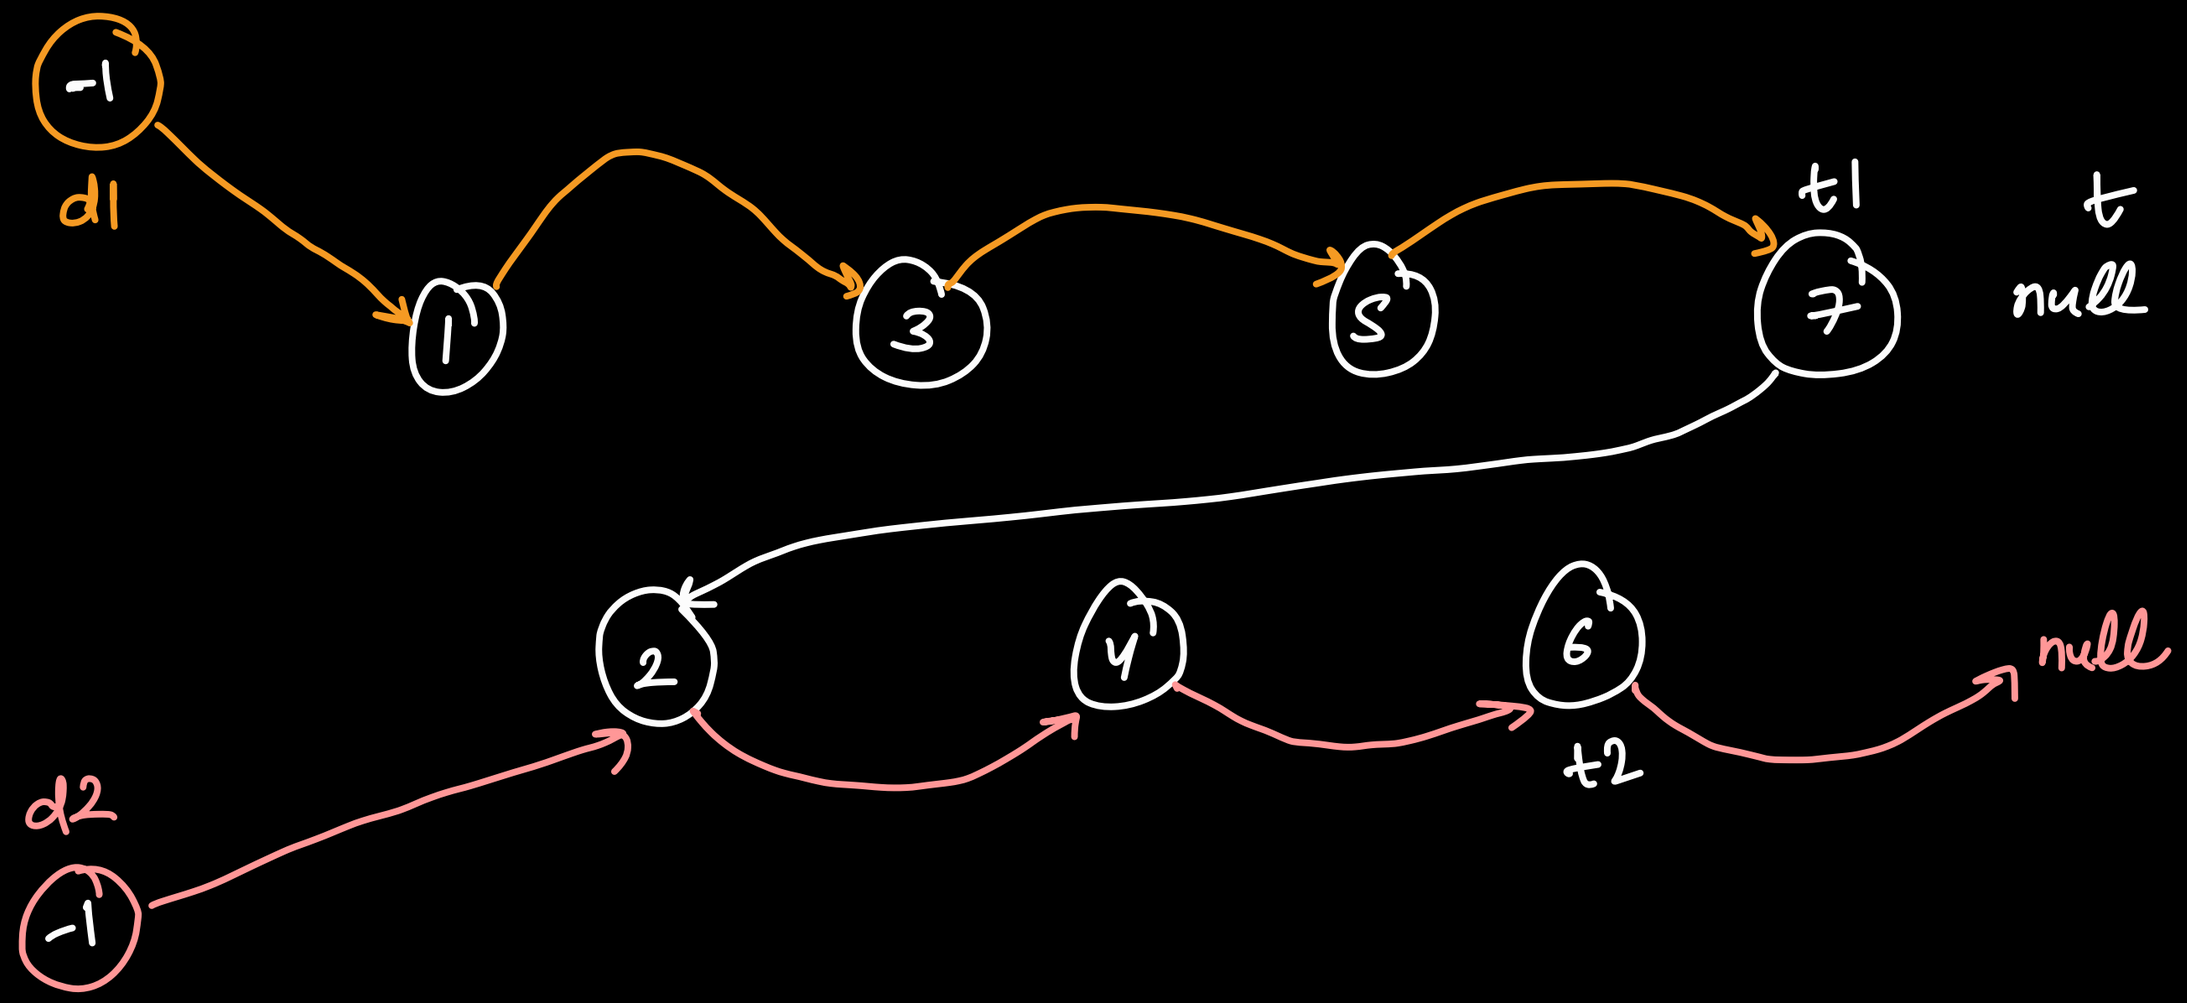
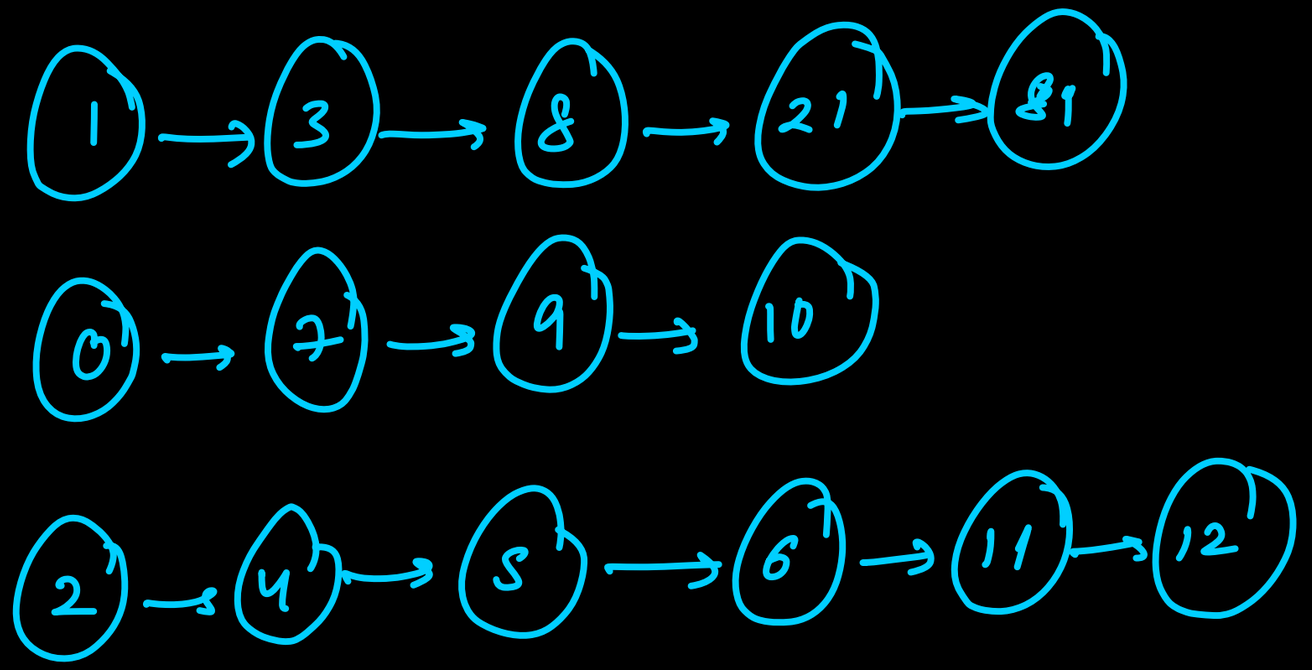
Q Odd Even Linked List [leetcode]



Ques: Merge K Sorted Linked Lists

$k = 3$



array = { h1, h2, h3, h4, h5, h6 }

GFG Practice

Ques: Merge K Sorted Linked Lists

$arr = \{ l1, l2, l3, l4, \ldots \underbrace{\quad}_{} lk \}$

$$T.n.O. = n + n + 2n + n + 3n + n + 4n + n \ldots (k-1)n + n$$

$$= n + 2n + 3n + \ldots (k-1)n + (k-1)n$$

$$= \frac{n(k-1)k}{2} + n(k-1)$$

$$\cong O(nk^2)$$

GFG Practice

Ques: Merge K Sorted Linked Lists

$\{ l1, l2, l3, l4, l5, l6, l7, l8 \}$

$l12 \quad l34 \quad l56 \quad l78$

$l1234 \quad l5678$

$l12345678$

$2n + 2n + 2n + 2n \quad Kn$

$4n + 4n \quad Kn$

$8n \quad Kn$

$T.C. = O(Kn \log K)$

GFG Practice

Ques: Merge K Sorted Linked Lists

{ }

{ 2 3 4 1 2 7 8 5 6 }

while (arr1.size + arr2.size > 1) {

while (pehla khatam)

}

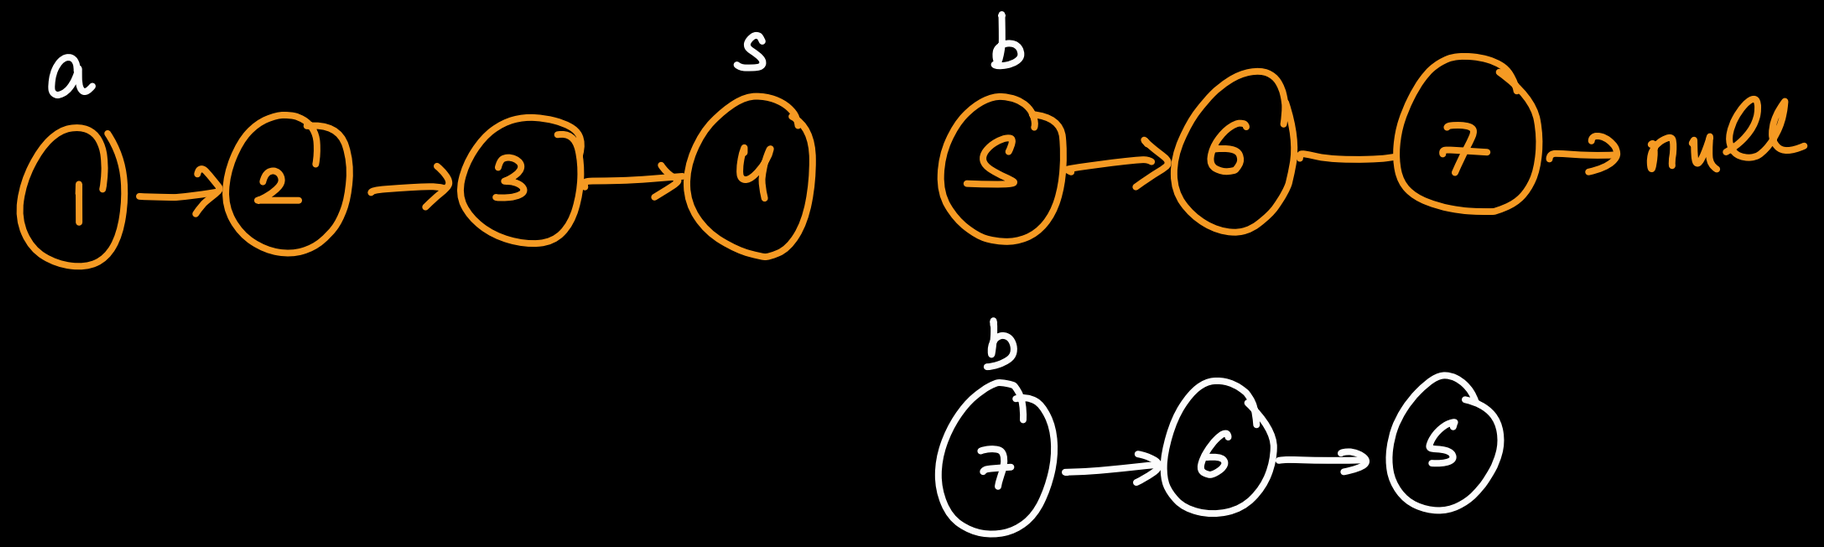
while (doosra khatam)

}

GFG Practice

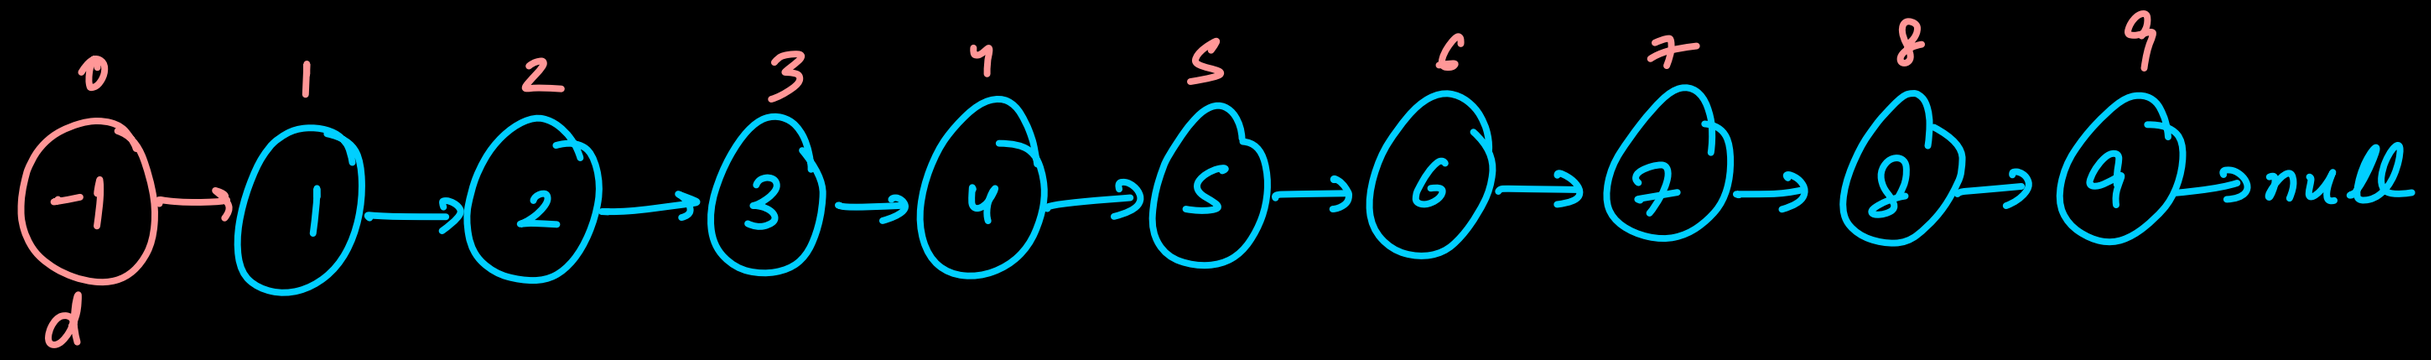
HW

~~Ques~~: Reorder List

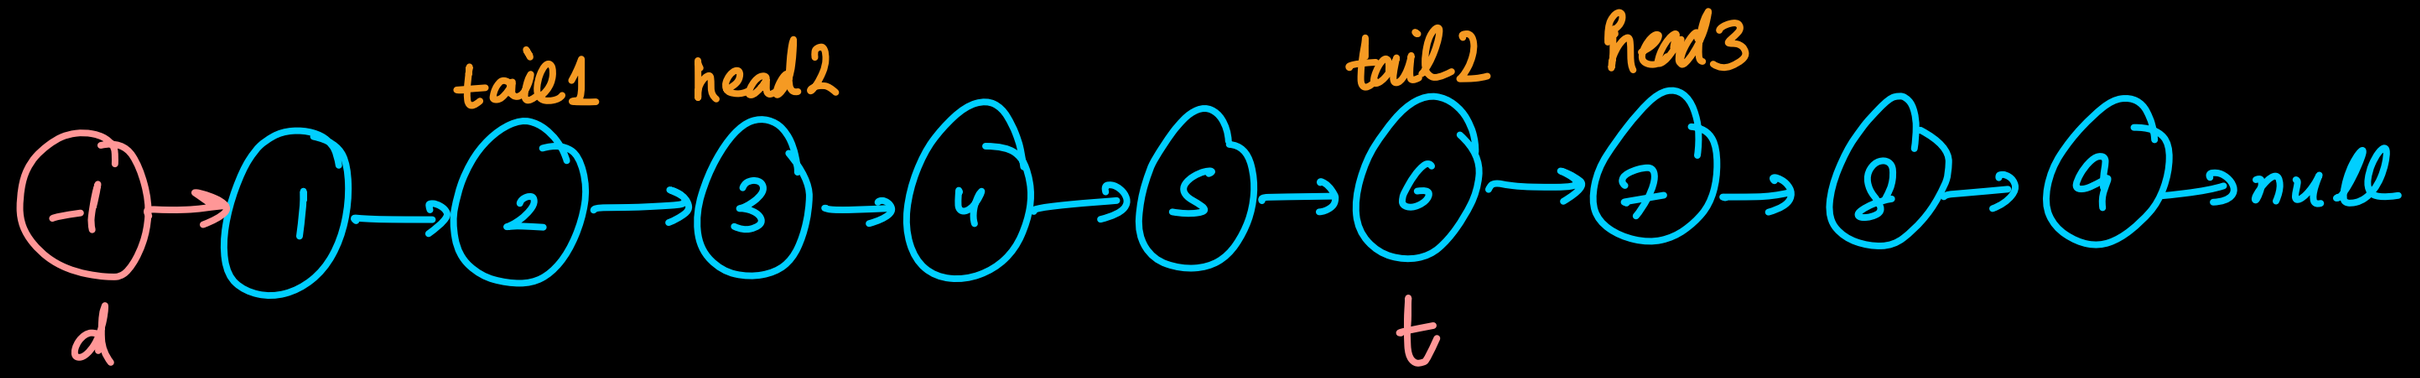


GFG Practice

Ques: Reverse a sublist of a linked list



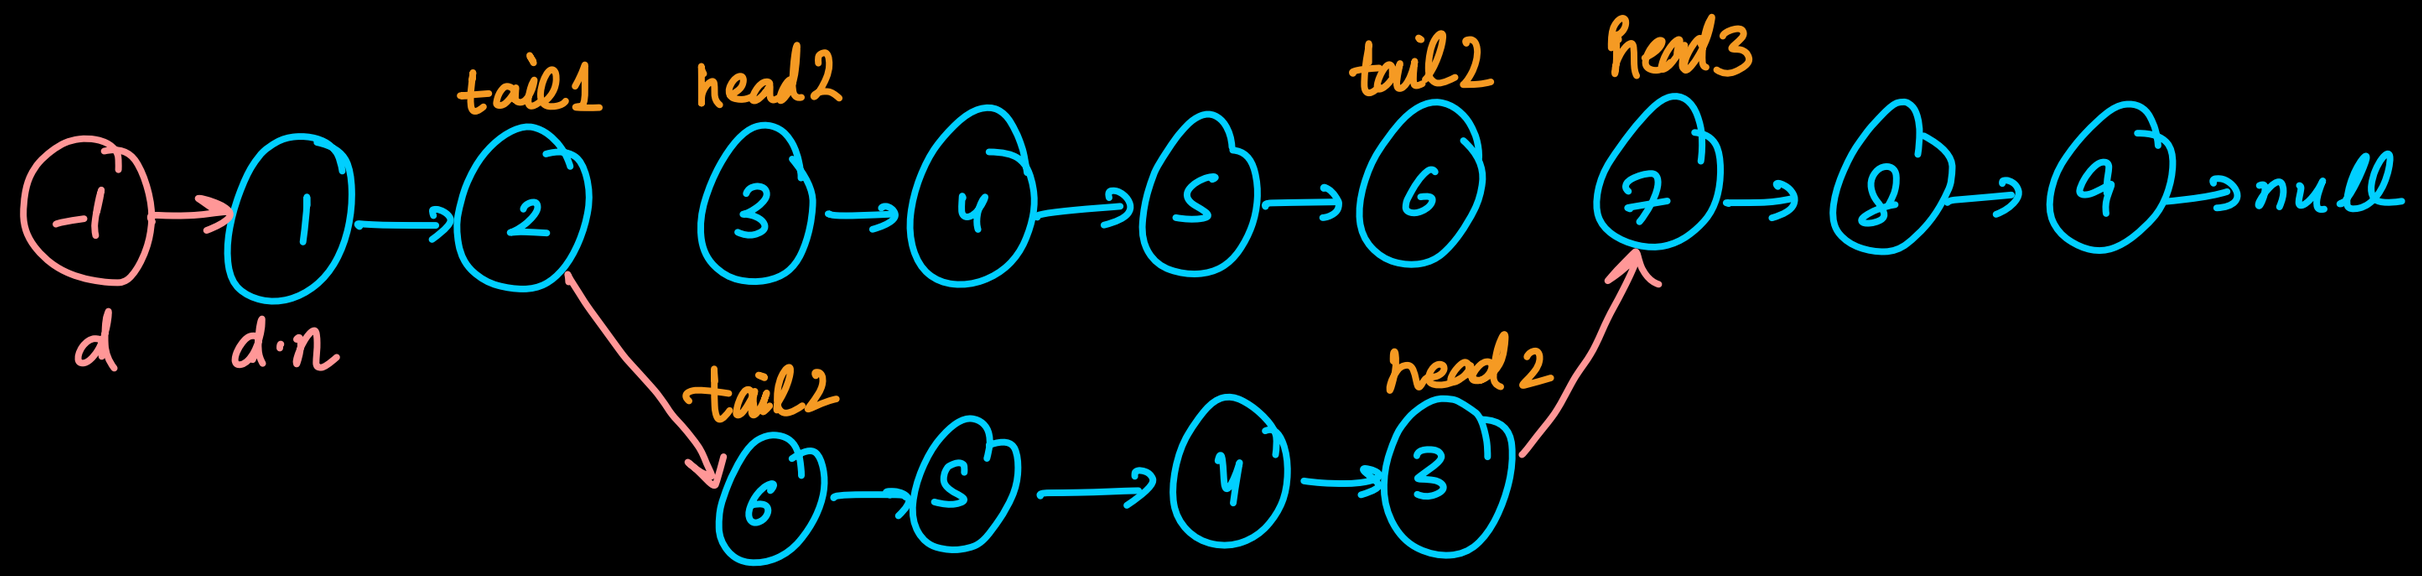
$l = 3, \quad r = 6$



$l-1$ times loop $\qquad r-l+1$ times

GFG Practice

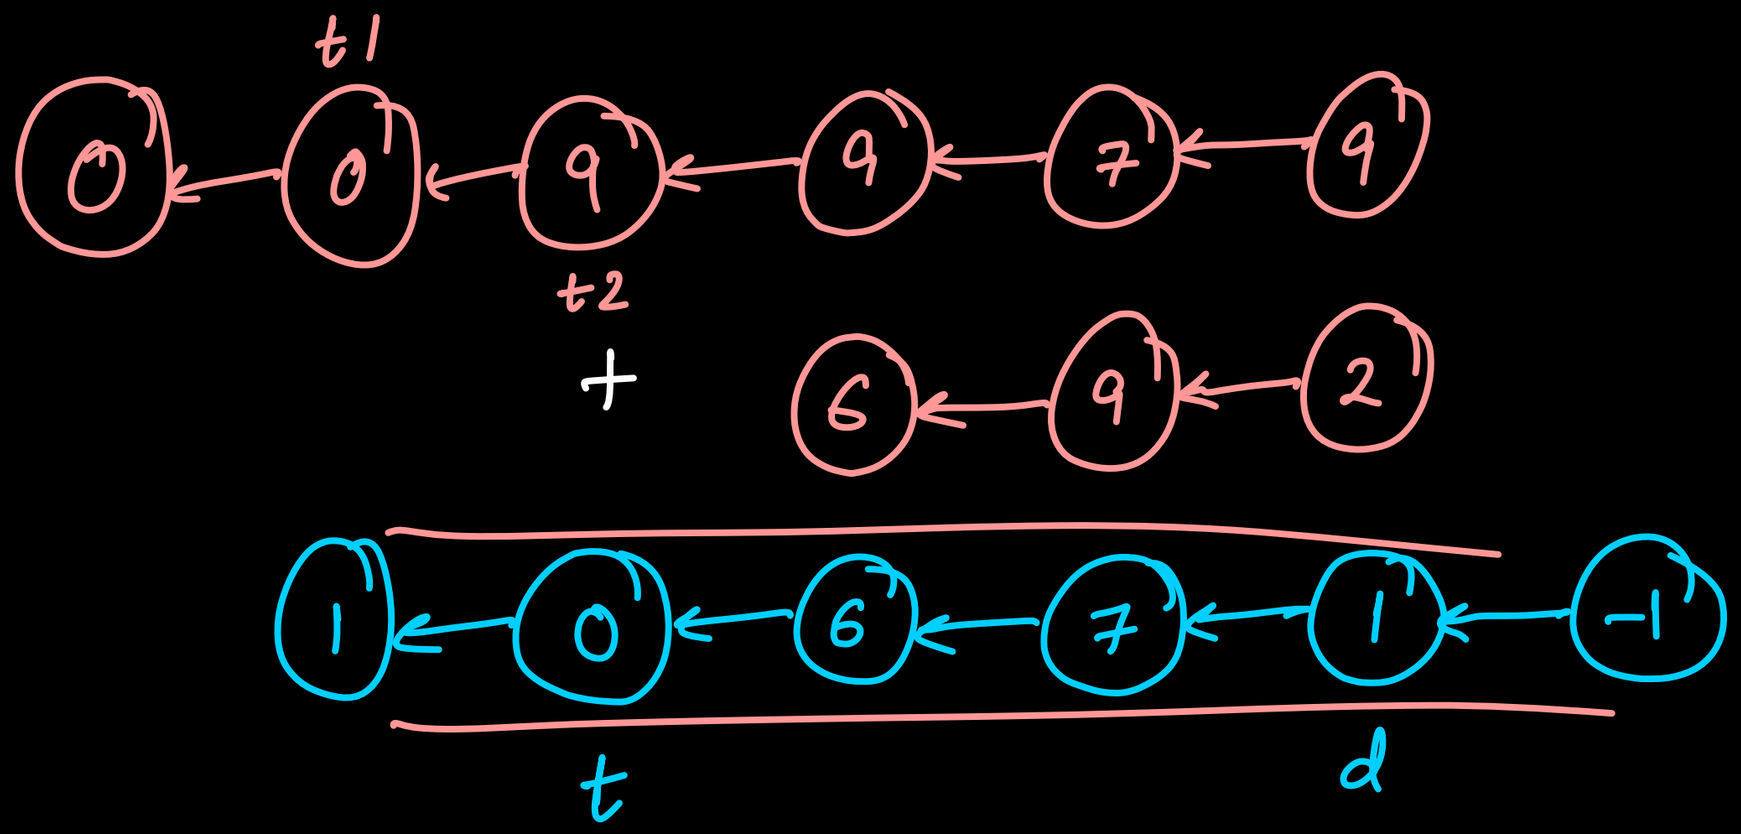
Ques: Reverse a sublist of a linked list



GFG Practice

Ques: Add number Linked Lists

carry = 0 1 1 1 1



Step 1 : Reverse both LL

Step 2: Dummy Node

sum = carry + t1.data + t2.data

sum % 10

GFG Practice
